

# Microsoft Office paket:

- Obuhvata sledeće osnovne aplikacije: **Microsoft Word**, **Microsoft Excel**, **Microsoft Power Point**, **Microsoft Outlook** i o njima će biti reči.
- Postoje i dopunske aplikacije: Microsoft Front Page, Microsoft Access, Microsoft Project ... ali o njima nećemo govoriti.
- **Microsoft Word**: Procesor teksta (kucanje izveštaja, seminarskih i diplomskih radova). Zbog rasprostranjenog .doc formata treba znati raditi u njemu.
- **Microsoft Excel**: Za računanje i tabele (rasprostranjen .xls format i relativno dobra organizacija pomoćiće vam u sređivanju i organizaciji podataka).
- **Microsoft Power Point**: Za prezentacije izveštaja, seminarskih i diplomskih radova (lepo organizovan program koji je među najboljima u svojoj oblasti).
- **Microsoft Outlook**: Program za e-mail, newsgrupe i kontakte (iako ne savršen, jedan od najviše korišćenih programa iz Office paketa - kompatibilan sa mnogim mob. softverom).

# Osnovne funkcije Excel-a:

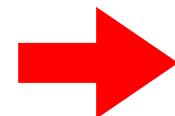

- “Sređivanje” podataka tj. višestruka primena određenih računskih operacija radi izračunavanja nekih fizičkih veličina čest je posao u fizičkoj hemiji.
- Jedan od najefikasnijih programa koji ovo može sa lakoćom da izvede je Microsoft Excel.
- Ovo je program koji se koristi za unakrsne proračune podataka i prikazivanje grafika.
- Od 1993. godine u Excel je uključen i program Visual Basic for applications, programski jezik, koji je omogućio automatizaciju zadataka u Excel-u.

# Microsoft Excel 2003:

## *O čemu će biti reči:*

1. Osnovne funkcije Excel-a (uvod, početak, unos podataka, ćelije, komande).
2. Upoznavanje sa radnim panelima (kreiranje, otvaranje, zatvaranje, pretraga).
3. Rad sa podacima (unos, editovanje, kopiranje, linkovanje pretraga).
4. Rad sa redovima i kolonama (promena karakteristika, rad sa ćelijama ...).
5. Rad sa formulama i funkcijama (unos, kopiranje i editovanje formula i funkcija).
6. Promena radnog okruženja (promene karakteristika statusnih i radnih alatki).
7. Šminkanje podataka (prikaz podataka, promena formata zapisa podataka).
8. Rad sa više radnih panela (simultani prenos podataka, formula i funkcija).
9. Rad sa objektima (Word Art, Clip Art, 3-D objekti, slike i dijagrami).
10. Ispis rezultata (štampanje podataka, kreiranje listi i izveštaja).
11. Zaštita podataka (kako zaštiti fajlove od neovlašćenog korišćenja).
12. Kreiranje "pametnih" petlji i makroa.

# Pokretanje Excel-a:

**START EXCEL**

The screenshot shows the Windows Start menu for a user named Adam. Step 1 highlights the 'start' button. Step 2 highlights the 'All Programs' link. Step 3 highlights the 'Microsoft Office' category. Step 4 highlights the 'Microsoft Office Excel 2003' icon. A red arrow points from the Start menu to the Microsoft Excel window.

**1** Click **start**.  
**2** Click **All Programs** to view a list of the programs on your computer.  
*Note: If you are using an earlier version of Windows, click **Programs** in step 2.*

**3** Click **Microsoft Office**.  
**4** Click **Microsoft Office Excel 2003**.

The Microsoft Excel window appears, displaying a blank

**Microsoft Excel - Book1**

The Microsoft Excel window is shown with a red box around the 'Getting Started' task pane. The task pane displays links to Microsoft Office Online, news about Excel, and a search bar. A red arrow points from the task pane to the 'X' button in the top right corner of the Excel window.

This area displays the Getting Started task pane, which allows you to quickly perform common tasks. For information on using the task pane, see page 16.

A button for the Microsoft

**EXIT EXCEL**

**1** When you finish using Excel, click **X** to exit Excel and close the Microsoft Excel window.

# Prozori u Excel-u:

The Excel window displays many items you can use to work with your data.

## Formula Bar

Displays the cell reference and the contents of the active cell. A cell reference identifies the location of each cell in a worksheet and consists of a column letter followed by a row number, such as **A1**.

## Active Cell

Displays a thick border. You enter data into the active cell.

## Cell

The area where a row and column intersect.

## Column

A vertical line of cells. A letter identifies each column.

## Row

A horizontal line of cells. A number identifies each row.

## Title Bar

Shows the name of the displayed workbook.

## Menu Bar

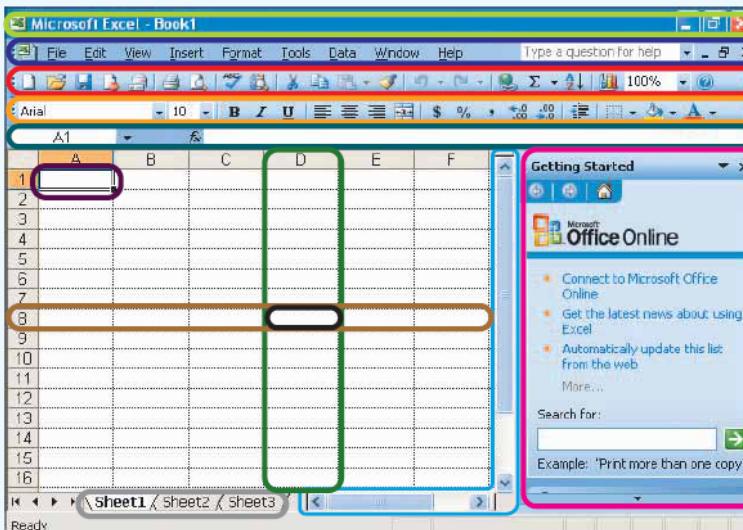

Provides access to lists of commands available in Excel and displays an area where you can type a question to get help information.

## Standard Toolbar

Contains buttons you can use to select common commands, such as Save and Print.

## Formatting Toolbar

Contains buttons you can use to select common formatting commands, such as Bold and Underline.

## Worksheet Tabs

Each Excel file, called a workbook, is divided into several worksheets. Excel displays a tab for each worksheet.

## Scroll Bars

Allow you to browse through a worksheet.

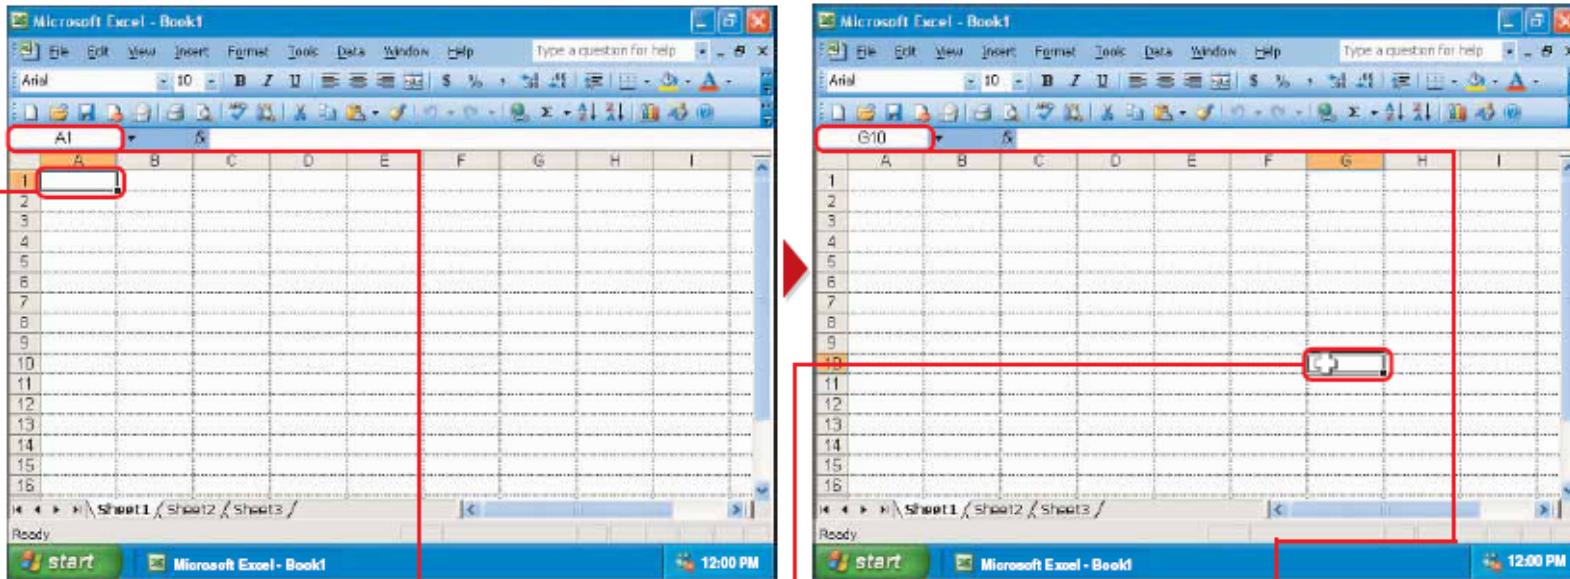

## Task Pane

Contains options you can select to perform common tasks, such as creating a new workbook.

- Naslov fajla
- Meni paleta
- Standardni toolbar
- Formatting toolbar
- Formula bar
- Aktivna ćelija
- Ćelija
- Kolona
- Red
- Radne table
- Barovi za skrolovanje
- Radni paneli

# Promena aktivne ćelije:

## CHANGE THE ACTIVE CELL

The active cell displays a thick border.

The cell reference for the active cell appears in this area. A cell reference identifies the location of each cell in a worksheet and consists of a column letter followed by a row number (example: **A1**).

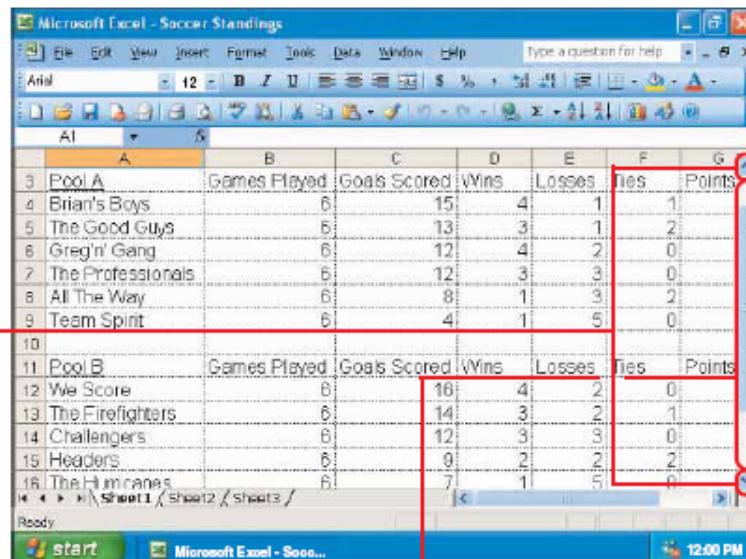

1 Click the cell you want to make the active cell.

*Note: You can also press the **←**, **→**, **↑** or **↓** key to change the active cell.*

The cell reference for the new active cell appears in this area.

# Skrolovanje kroz radnu površ:

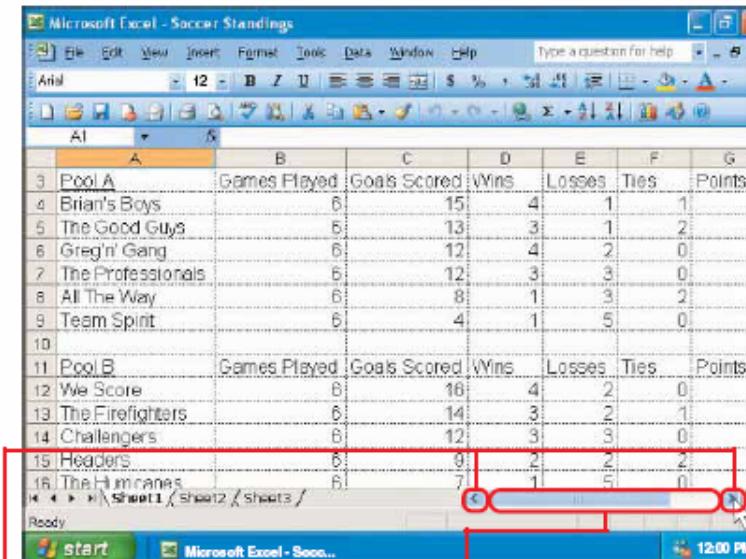

## SCROLL THROUGH A WORKSHEET

### SCROLL UP OR DOWN

- 1 To scroll up or down one row, click or .

To quickly scroll to any row in your worksheet, position the mouse over the scroll box and then drag the scroll box along the scroll bar until the row you want to view appears.

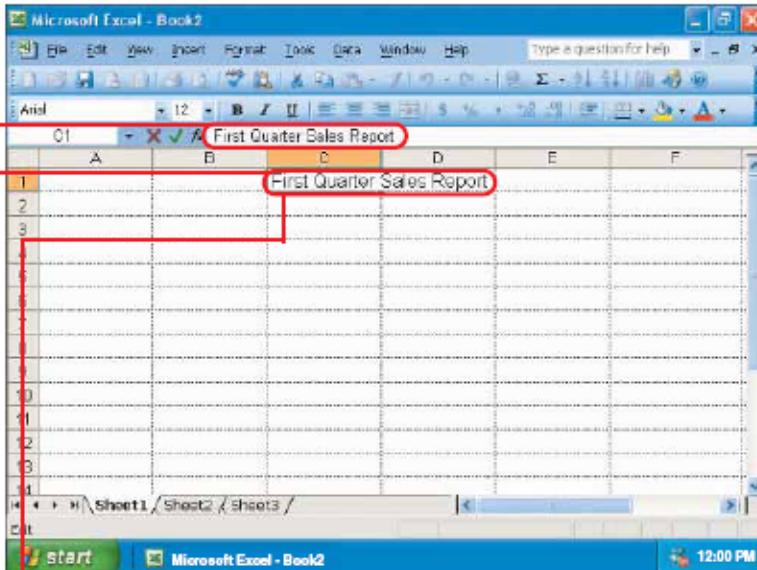

### SCROLL LEFT OR RIGHT

- 1 To scroll left or right one column, click or .

To quickly scroll to any column in your worksheet, position the mouse over the scroll box and then drag the scroll box along the scroll bar until the column you want to view appears.

# Unos podataka:

## ENTER DATA

1 Click the cell where you want to enter data. Then type the data.

The data you type appears in the active cell and in the formula bar.

If you make a typing mistake while entering data, press the **Backspace** key to remove the incorrect data. Then type the correct data.

First Quarter Sales Report

2 Click the name of the workbook you want to switch to.

- The workbook appears.
- This area shows the name of the displayed workbook.

- The taskbar displays a button for each open workbook. You can also click the buttons on the taskbar to switch between the open workbooks.

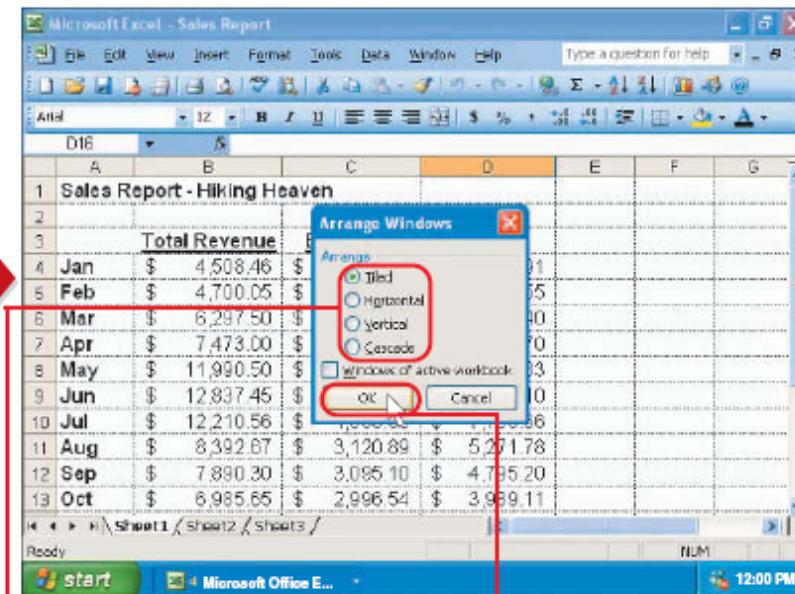

# Uvid u sve aktivne radne sveske:

## VIEW ALL OPEN WORKBOOKS

- 1 Click **Window**.
- 2 Click **Arrange**.

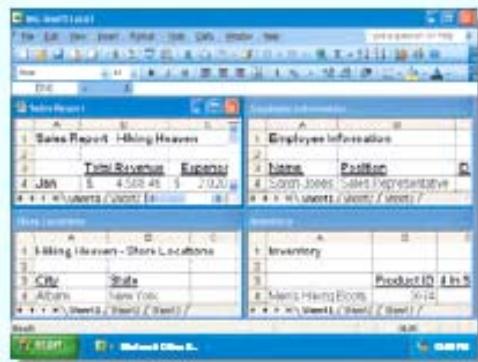

*Note: If Arrange does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

- 3 The **Arrange Windows** dialog box appears.
- 4 Click **OK** to select the way you want to arrange your open workbooks (radio button changes to checked).
- 4 Click **OK** to arrange your workbooks.

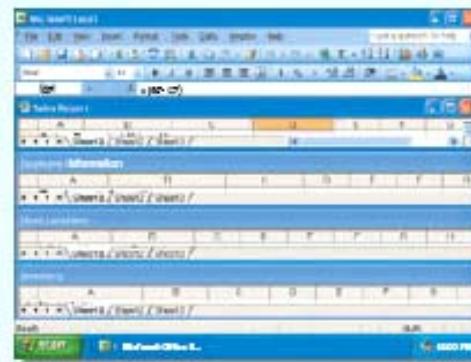

Prvo je potrebno izabrati na koji način će aktivne sveske biti prikazane  
Window-Arrange

# Tipovi prkaza radnih sveski:

## Tiled

The workbooks appear as tiled squares, allowing you to clearly view the contents of each workbook.

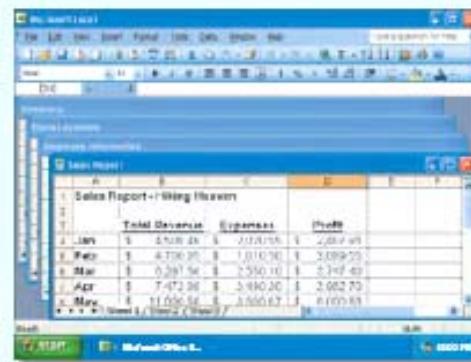

## Horizontal

The workbooks appear one above the other.

## Vertical

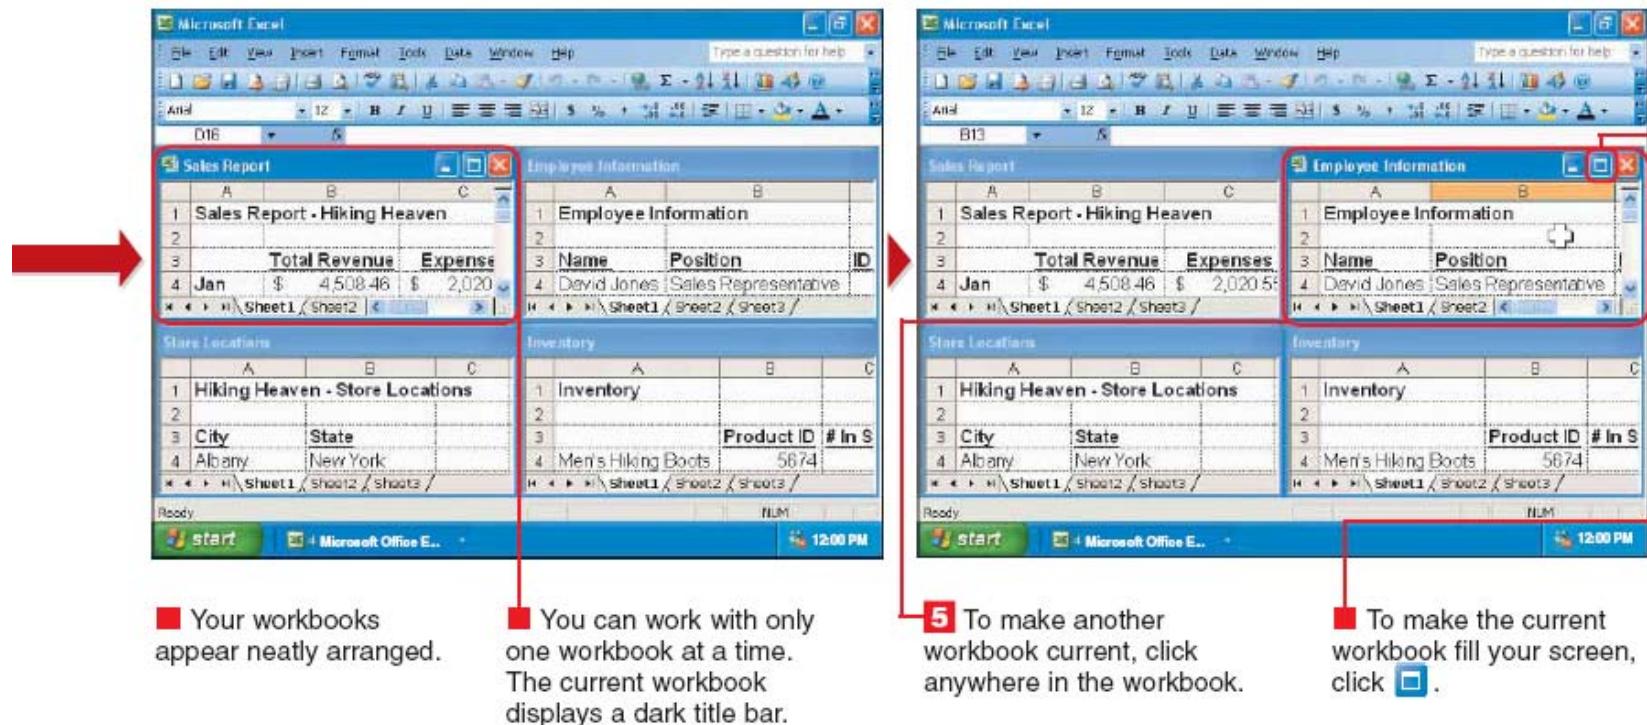

The workbooks appear side by side.

## Cascade

The workbooks overlap each other, allowing you to clearly view the title bar of each workbook.

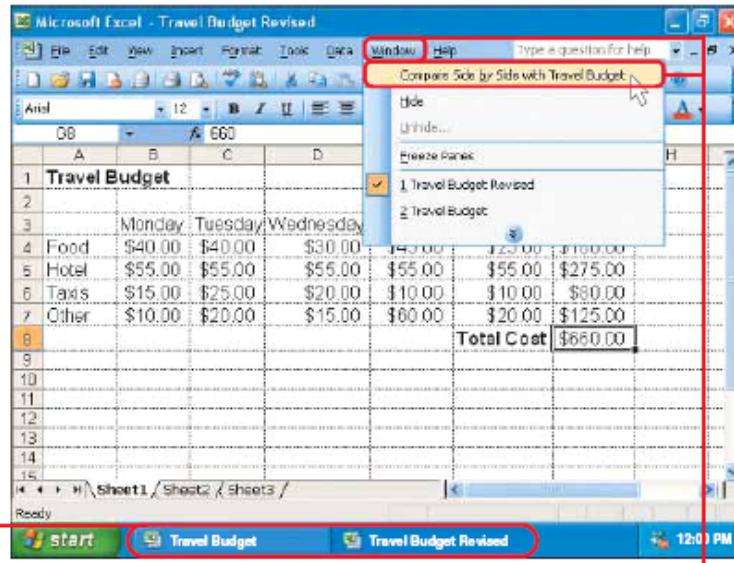

# Uvid u sve aktivne radne sveske:

- Može se raditi istovremeno samo u jednoj radnoj svesci.
- Moguć je aktivni prelazak između radnih sveski.

# Poređenje radnih sveski:

## COMPARE WORKBOOKS

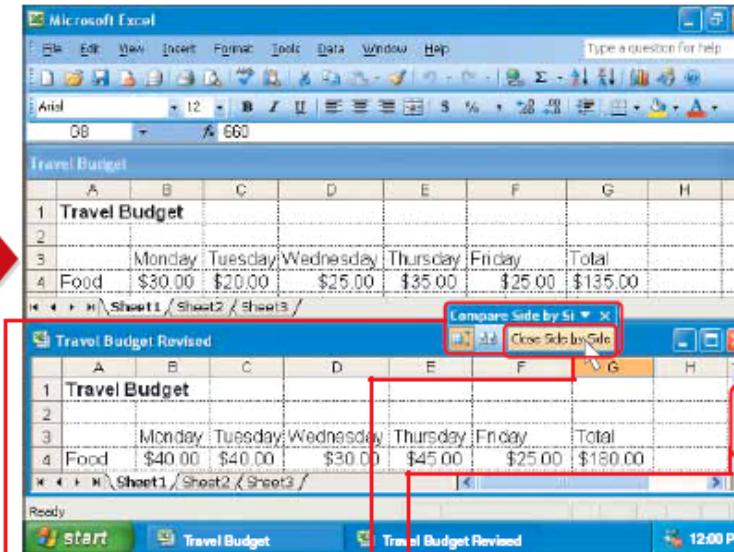

1 Open the two workbooks you want to compare.

Note: To open a workbook, see page 32.

2 Click **Window** in the current workbook.

3 Click **Compare Side by Side with** to compare the current workbook with the other open workbook.

Excel displays the workbooks on your screen. One workbook appears above the other workbook.

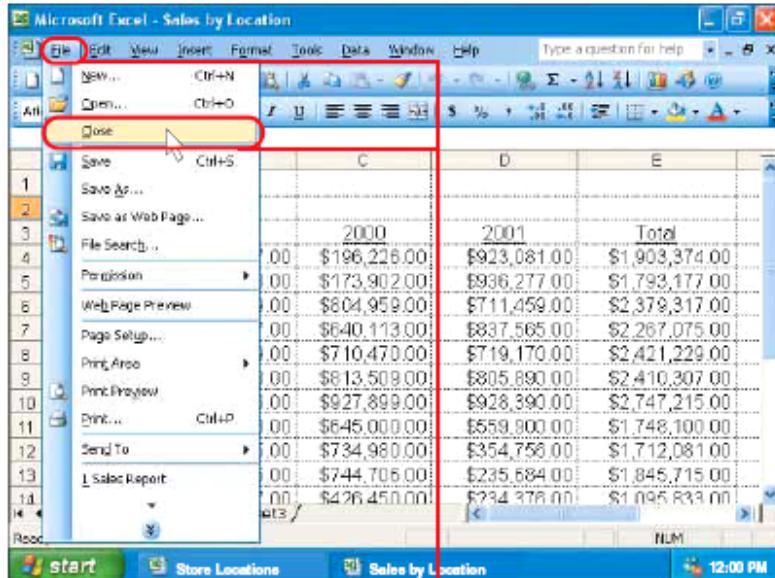

The Compare Side by Side toolbar also appears.

4 To scroll through the workbooks, drag the scroll box up or down in one workbook. Excel automatically scrolls the other workbook for you.

5 When you finish comparing the workbooks on your screen, click **Close Side by Side**.

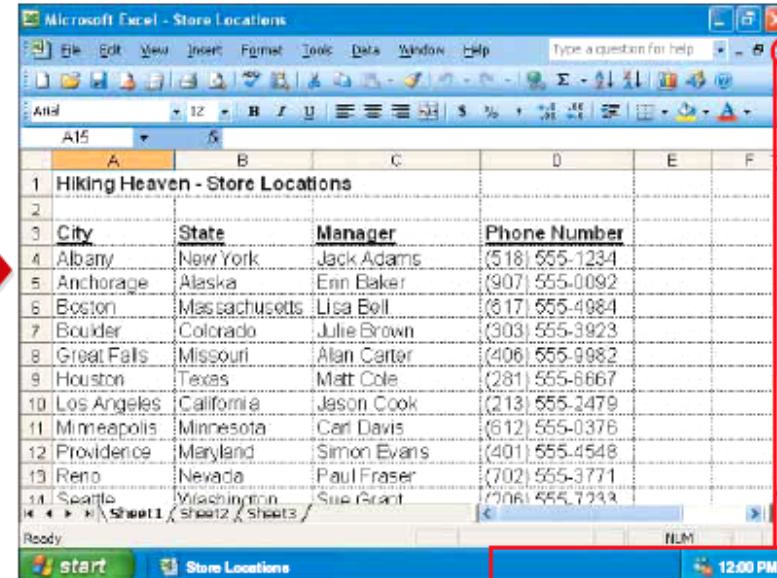

# Zatvaranje radnih sveski:

## CLOSE A WORKBOOK

Before closing a workbook, you should save any changes you made to the workbook. To save a workbook, see page 22.

- 1 Click **File**.
- 2 Click **Close** to close the workbook.

The workbook disappears from your screen.

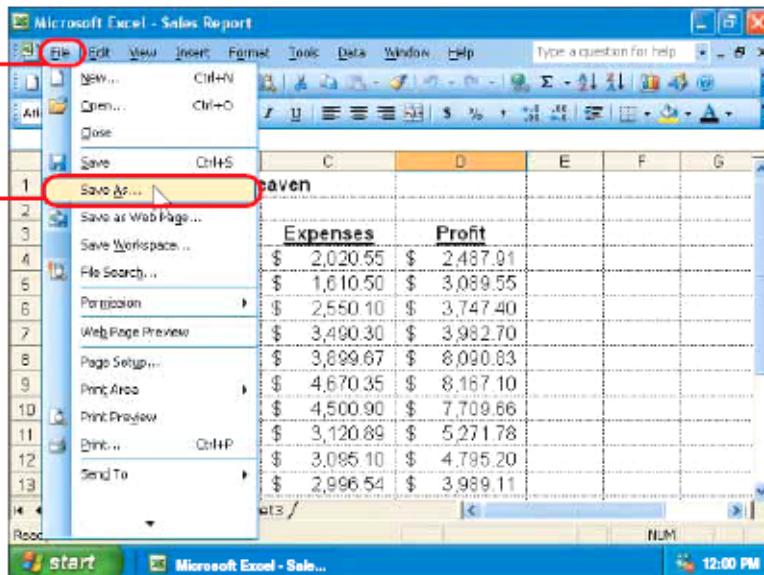

If you had more than one workbook open, the second last workbook you worked with appears on your screen.

## QUICKLY CLOSE A WORKBOOK

- To quickly close a workbook, click **X**.

# Čuvanje pod drugim imenom:

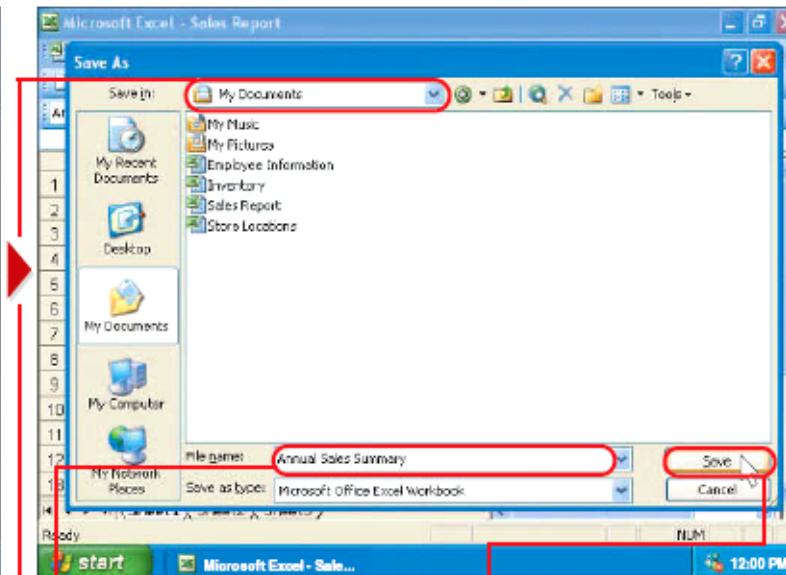

## SAVE A WORKBOOK WITH A NEW NAME

1 Click **File**.

2 Click **Save As**.

The Save As dialog box appears.

3 Type a new name for the workbook.

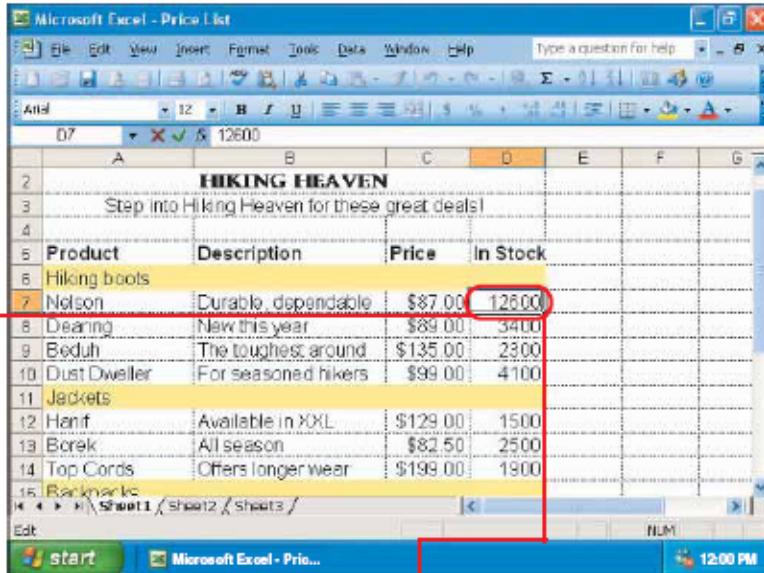

This area shows the location where Excel will store your workbook. You can click this area to change the location.

4 Click **Save** to save your workbook with the new name.

Excel saves a copy of your workbook with the new name.

3 The data in the cells you selected disappears.

4 To deselect cells, click any cell.

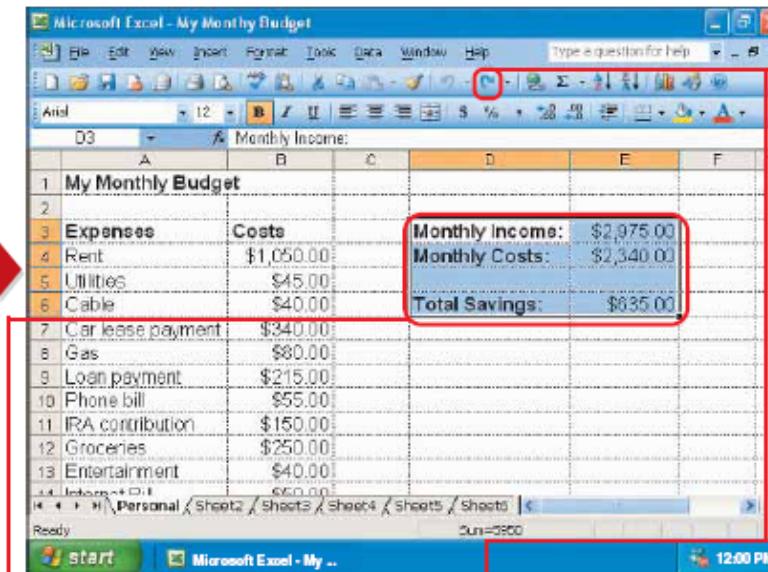

# Poništavanje promena:

## UNDO CHANGES

- 1 Click to undo the last change you made to your worksheet.

*Note: If is not displayed, click on the Standard toolbar to display the button.*

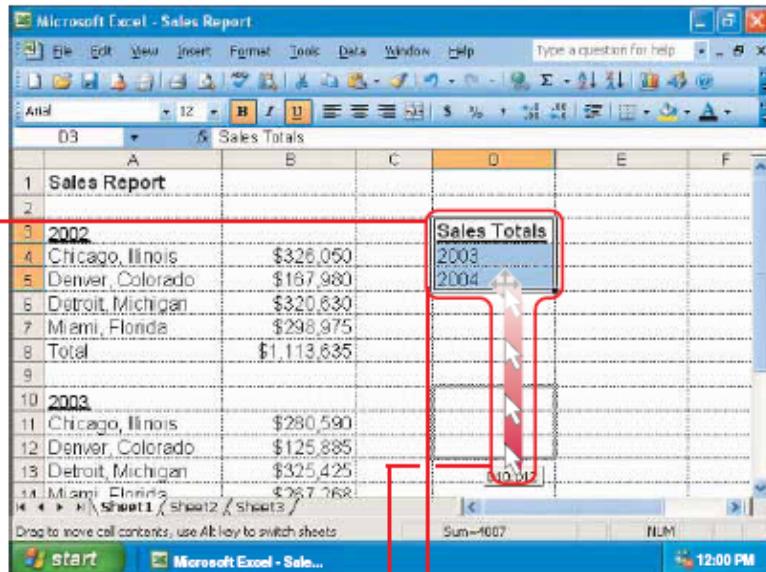

- Excel cancels the last change you made to your worksheet.
- You can repeat step 1 to cancel previous changes you made.

To reverse the results of using the Undo feature, click .

*Note: If is not displayed, click on the Standard toolbar to display the button.*

# Premeštanje i kopiranje podataka:

## MOVE OR COPY DATA

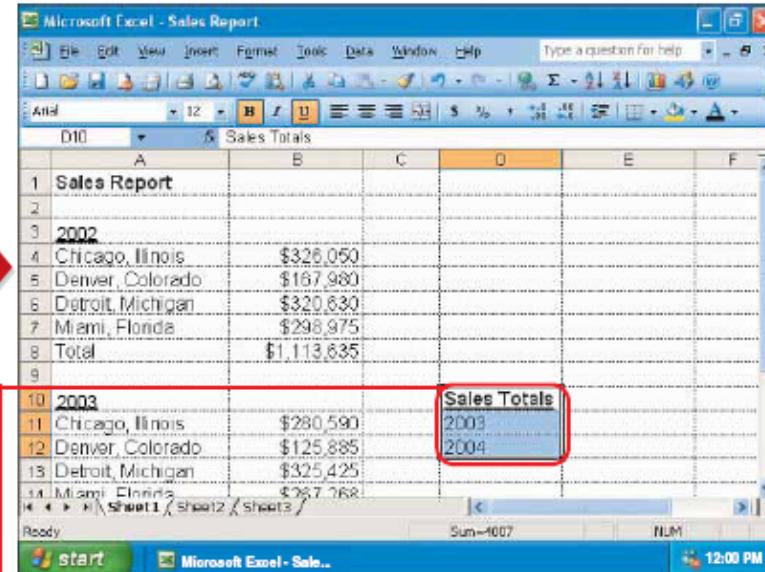

### USING DRAG AND DROP

1 Select the cells containing the data you want to move. To select cells, see page 10.

2 Position the mouse over a border of the selected cells ( changes to ).

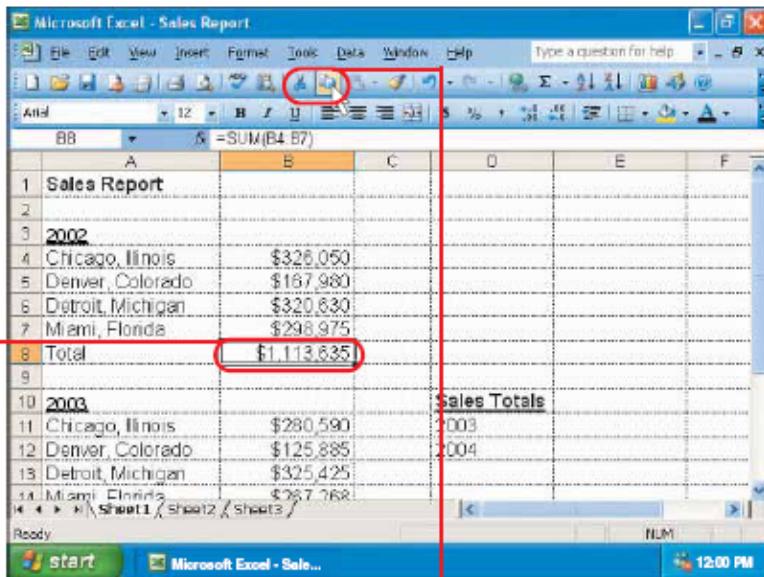

3 To move the data, drag the mouse to where you want to place the data.

■ The data moves to the new location.

■ To copy data, perform steps 1 to 3, except press and hold down the **Ctrl** key as you perform step 3.

# ...ili drugi metod:

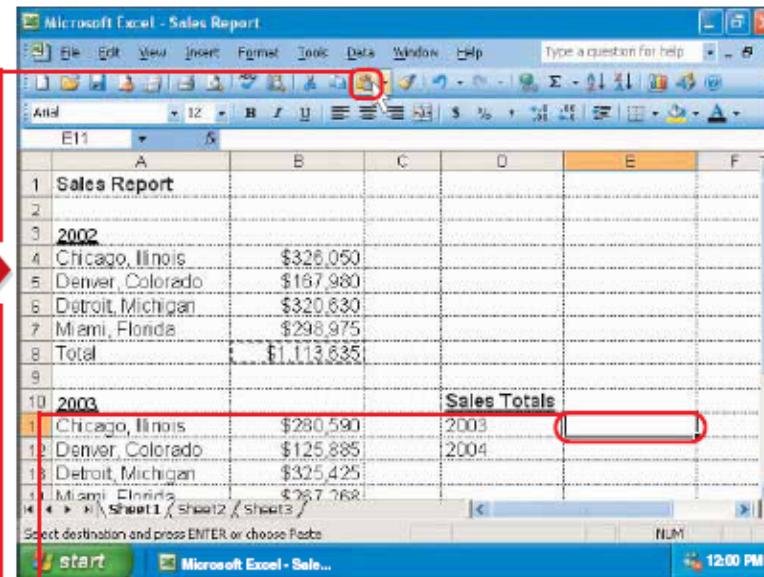

## USING THE TOOLBAR BUTTONS

- 1 Select the cells containing the data you want to move or copy. To select cells, see page 10.

- 2 Click one of the following buttons.

- Move data
- Copy data

- 3 Click the cell where you want to place the data. This cell will become the top left cell of the new location.

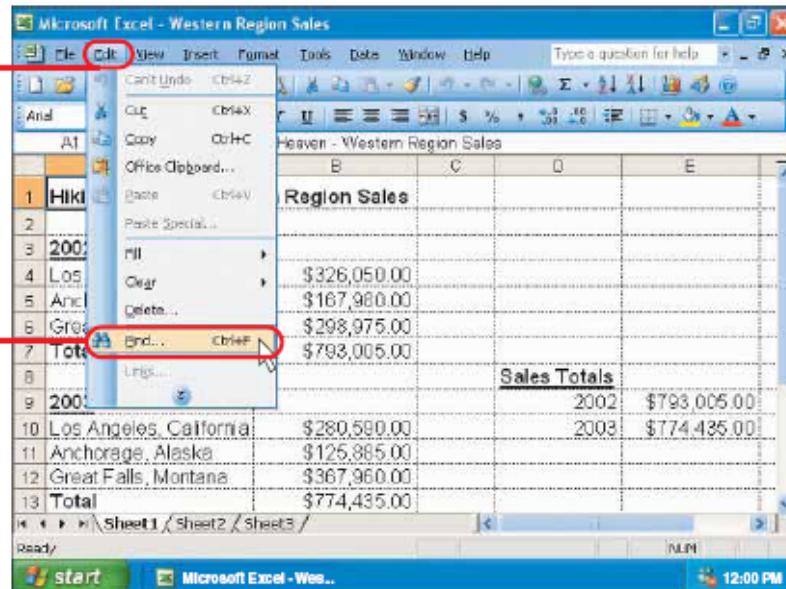

- 4 Click to place the data in the new location.

- The data appears in the new location.

*Note: A moving, dotted border may appear around the cells you selected to move or copy. To remove the border, press the **Esc** key.*

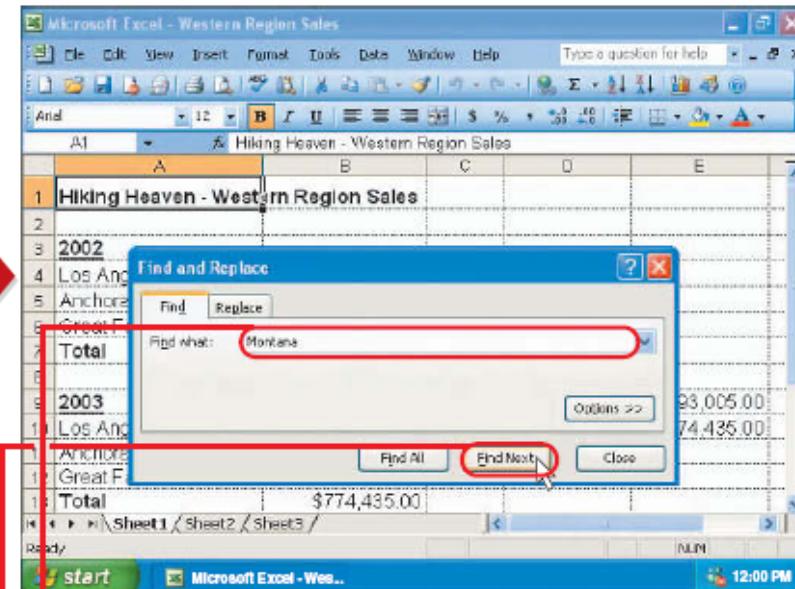

# Pronalaženje podataka:

## FIND DATA

- 1 Click **Edit**.
- 2 Click **Find**.

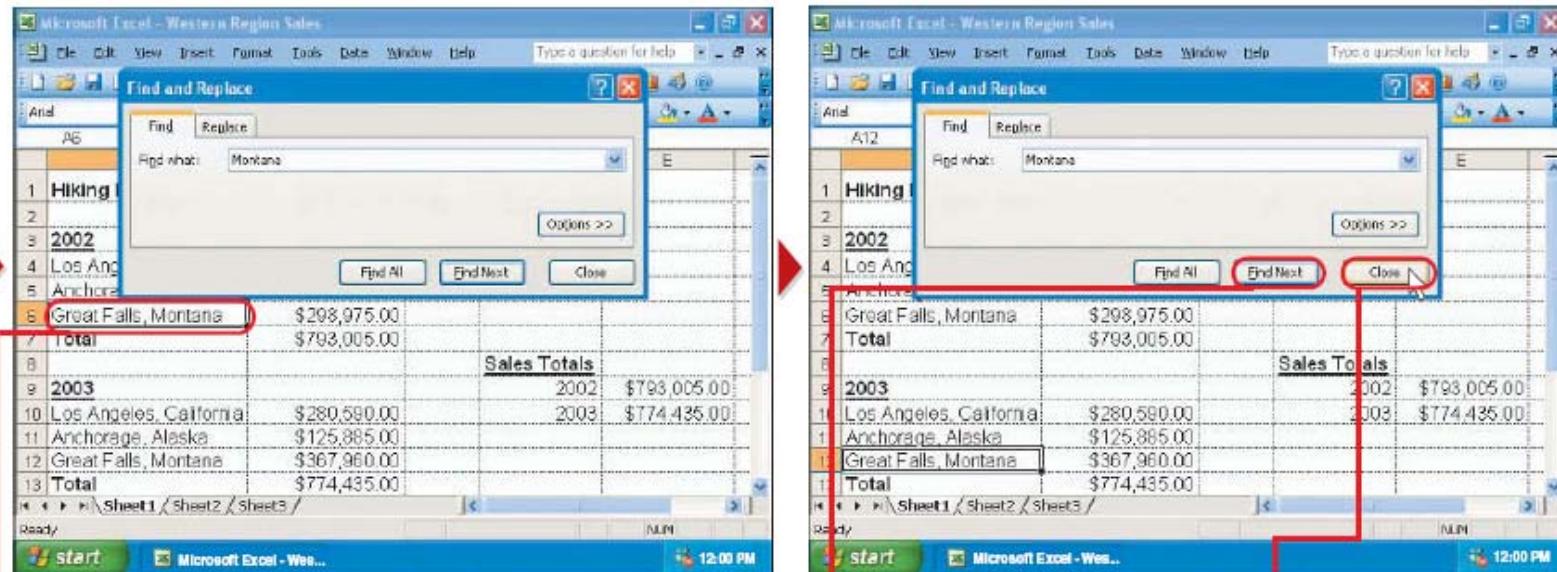

The Find and Replace dialog box appears.

- 3 Type the word or number you want to find.
- 4 Click **Find Next** to start the search.

*Note: A dialog box appears if Excel cannot find the word or number you specified. Click **OK** to close the dialog box and then skip to step 6.*

# Pronalaženje podataka:

Excel highlights the first cell containing the word or number.

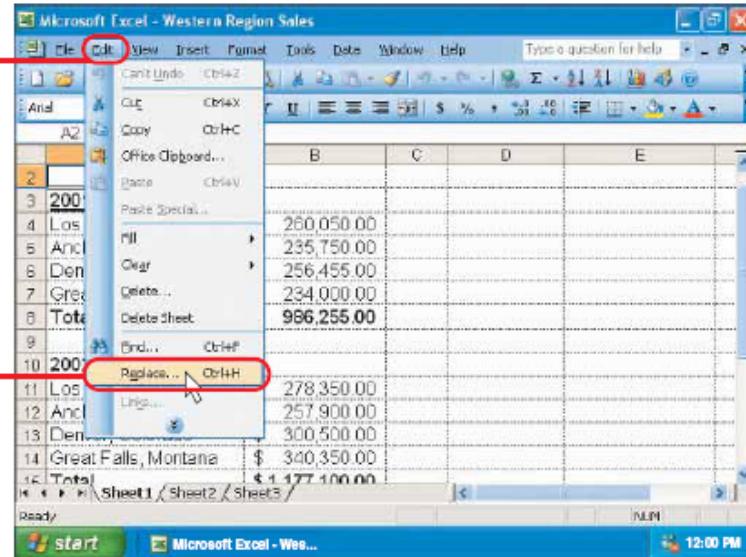

*Note: If the Find and Replace dialog box covers a cell containing the word or number you want to find, Excel will automatically move the dialog box to a new location.*

5 Click **Find Next** to find the next matching word or number. Repeat this step until you find the word or number you are searching for.

6 To close the Find and Replace dialog box at any time, click **Close**.

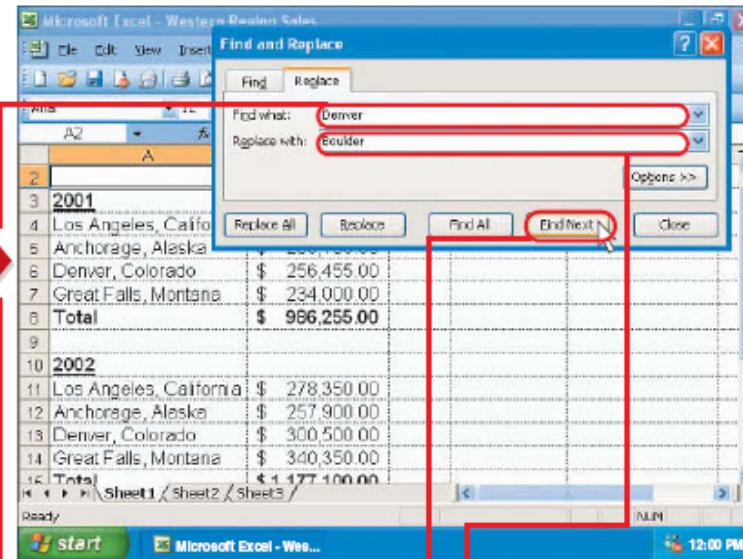

# Zamena podataka:

## REPLACE DATA

- 1 Click **Edit**.
- 2 Click **Replace**.

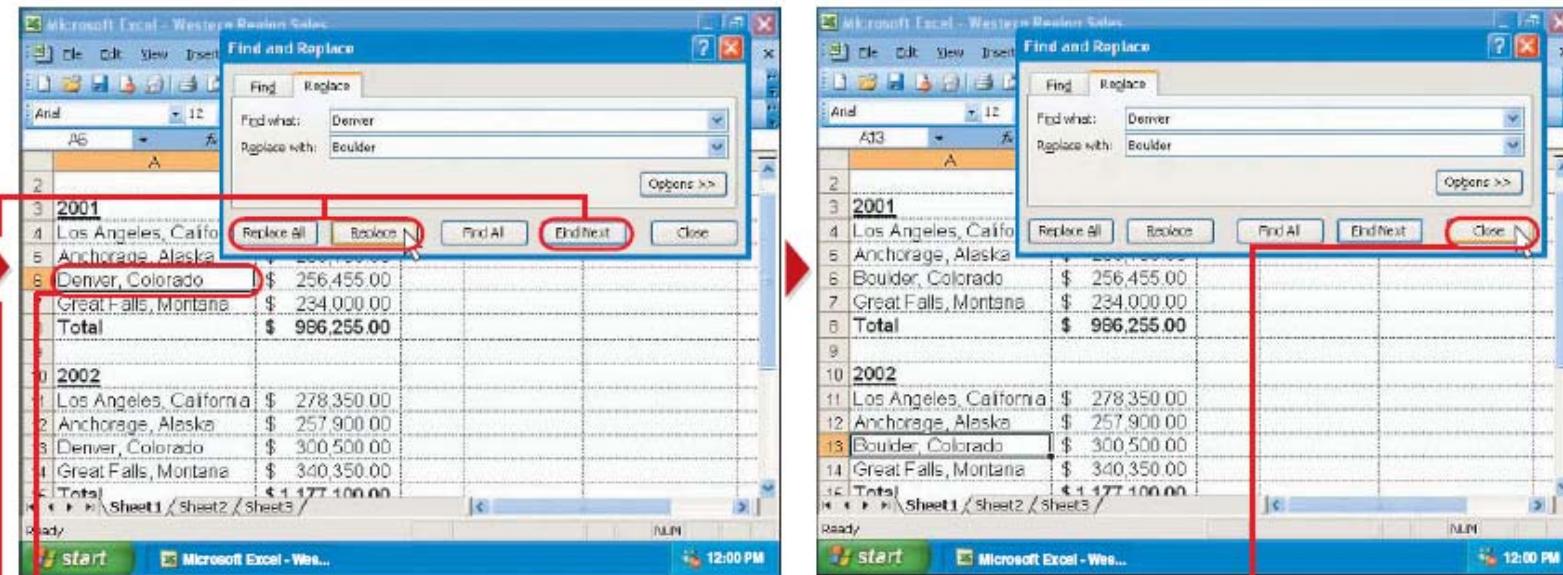

*Note: If Replace does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

- 3 Type the word or number you want to replace with new data.
- 4 Click this area and type the word or number you want to replace the data you typed in step 3.

*Note: If the areas already contain data, drag the mouse over the existing data and then type the word or number.*

# Zamena podataka:

Excel highlights the first cell containing the word or number you specified.

6 Click one of these options.

**Replace All** - Replace all occurrences of the word or number in the worksheet.

**Replace** - Replace the word or number.

**Find Next** - Ignore the word or number.

In this example, Excel replaces the word or number and searches for the next match.

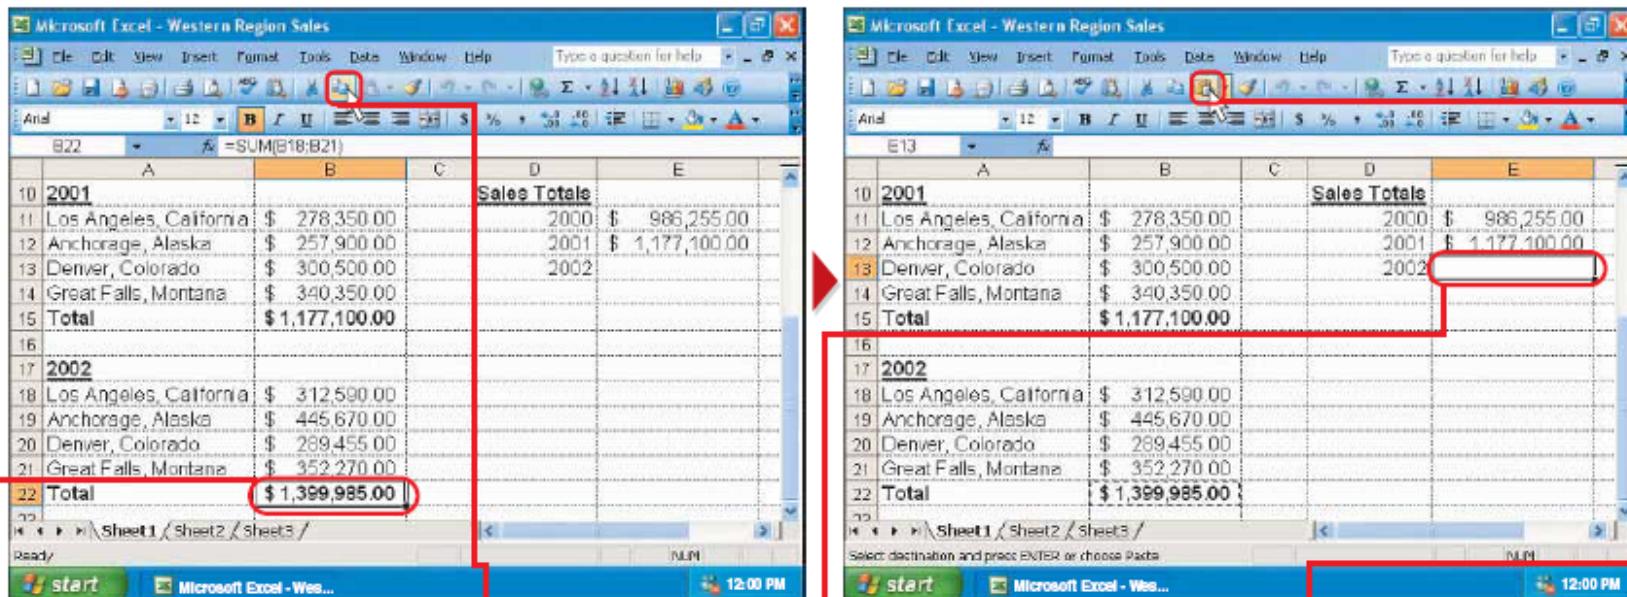

*Note: If you selected Replace All in step 6, a dialog box appears, stating that the data was replaced. Click OK to close the dialog box and then skip to*

7 Replace or ignore matching data until you find all the occurrences of the data you want to replace.

8 Click **Close** to close the Find and Replace dialog box.

# Linkovanje (podataka i formula):

## LINK DATA

1 Click the cell containing the data you want to link to another cell.

2 Click .

3 Click the cell where you want to place the linked data.

4 Click .

- Ukoliko želite da se podaci iz jedna ćelije pojavljuju i u nekoj drugoj ćeliji možemo ih linkovati (korisno je kada se koriste formule). Copy-Paste link.

# Linkovanje (podataka i formula):

The figure consists of two side-by-side screenshots of Microsoft Excel. Both screenshots show a table of sales data for the Western Region. In the left screenshot, a red arrow points from the bottom of the previous screenshot to the status bar, which displays 'Sheet1 / Sheet2 / Sheet3'. A red box highlights the 'Link Cells' option in the Paste Options menu that appears when right-clicking on cell E13. In the right screenshot, another red arrow points from the status bar to the formula bar, which now shows the formula '=B12' instead of '=SUM(E9:E12)'. A red box highlights the original cell reference '\$B\$2' in the formula bar. The data in cell E13 has been updated to reflect the value from cell B12.

	A	B	C	D	E
10	2001			Sales Totals	
11	Los Angeles, California	\$ 278,350.00	2000	\$ 986,255.00	
12	Anchorage, Alaska	\$ 257,900.00	2001	\$ 1,177,100.00	
13	Denver, Colorado	\$ 300,500.00	2002	\$ 2,163,355.00	
14	Great Falls, Montana	\$ 340,350.00			
15	Total	\$ 1,177,100.00			
16					
17	2002			Sales Totals	
18	Los Angeles, California	\$ 312,590.00	2000	\$ 986,255.00	
19	Anchorage, Alaska	\$ 445,670.00	2001	\$ 1,177,100.00	
20	Denver, Colorado	\$ 289,455.00	2002	\$ 1,399,985.00	
21	Great Falls, Montana	\$ 352,270.00			
22	Total	\$ 1,399,985.00			

■ The Paste Options button appears in your worksheet.

5 Click the Paste Options button to display a list of options.

6 Click **Link Cells**.

*Note: The cell you are linking may not display the same data as the original cell until you perform step 6.*

■

The linked data appears in the cell.

■ The formula bar displays the location of the original cell.

■ To remove the moving border around the original cell, press the **Esc** key.

■ When the data in the original cell changes, the linked data also changes.

- Linkovanje se može vršiti i između različitih radnih površina (dokumenata).  
Upotreba opcije "**Update links**".

# Imenovanje ćelija:

## NAME CELLS

This screenshot shows the Microsoft Excel interface with the title bar "Microsoft Excel - Western Region Sales". The menu bar includes File, Edit, View, Insert, Format, Tools, Date, Window, Help, and a search bar "Type a question for help". The ribbon tabs are Home, Insert, Page Layout, Formulas, Data, Page Break Preview, and Review. The status bar at the bottom shows "Sum = \$ 3,583,340.00" and "12:00 PM". The worksheet displays sales data for the Western Region. A red box highlights the "Totals" row at the top. Another red box highlights the "Sales Totals" row, which contains the values for the years 2000, 2001, and 2002.

Totals		B	C	D	E
3	2000				
4	Los Angeles, California	\$ 260,050.00			
5	Anchorage, Alaska	\$ 235,750.00			
6	Denver, Colorado	\$ 256,455.00			
7	Great Falls, Montana	\$ 234,000.00			
8	Total	\$ 986,255.00			
9					
10	2001		Sales Totals		
11	Los Angeles, California	\$ 278,350.00	2000	\$ 986,255.00	
12	Anchorage, Alaska	\$ 257,900.00	2001	\$ 1,177,100.00	
13	Denver, Colorado	\$ 300,500.00	2002	\$ 1,399,985.00	
14	Great Falls, Montana	\$ 340,350.00	Grand Total		
15	Total	\$ 1,177,100.00			
16					

1 Select the cells you want to name. To select cells, see page 10.

2 Click this area to highlight the existing information.

3 Type the name you want to use for the cells and then press the **Enter** key.

To deselect cells, click any cell.

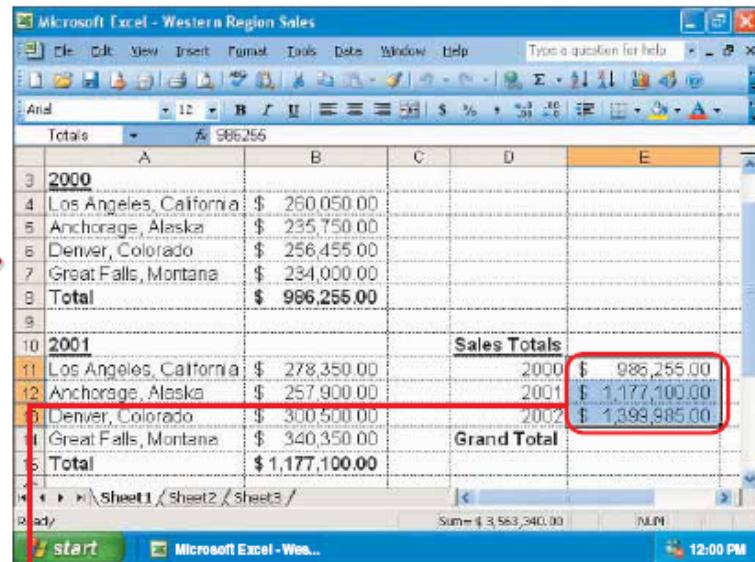

This screenshot shows the Microsoft Excel interface with the title bar "Microsoft Excel - Western Region Sales". The menu bar, ribbon, and status bar are identical to the previous screenshot. The worksheet displays the same sales data. A red box highlights the "Totals" row at the top. Another red box highlights the "Sales Totals" row, which contains the values for the years 2000, 2001, and 2002. The cell E14 is selected, and its address is displayed in the formula bar.

Totals		B	C	D	E
3	2000				
4	Los Angeles, California	\$ 260,050.00			
5	Anchorage, Alaska	\$ 235,750.00			
6	Denver, Colorado	\$ 256,455.00			
7	Great Falls, Montana	\$ 234,000.00			
8	Total	\$ 986,255.00			
9					
10	2001		Sales Totals		
11	Los Angeles, California	\$ 278,350.00	2000	\$ 986,255.00

15	Total	\$ 1,177,100.00			
16					

1 Click in this area.

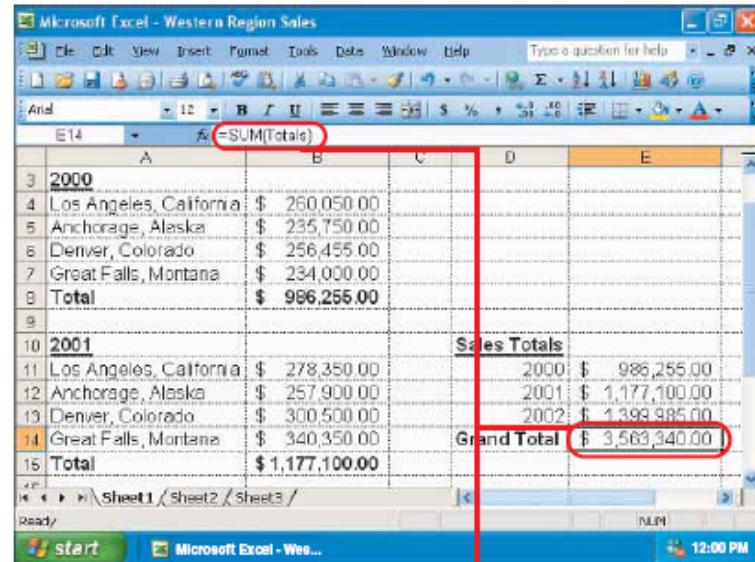

2 Click the name of the cells you want to select.

# Imenovanje ćelija:

■ Excel highlights the cells in your worksheet.

- Imenovanje celija olakšava rad sa formulama i sumama.

## USING NAMED CELLS IN FORMULAS AND FUNCTIONS

**Naming cells can make formulas and functions easier to enter and understand.**

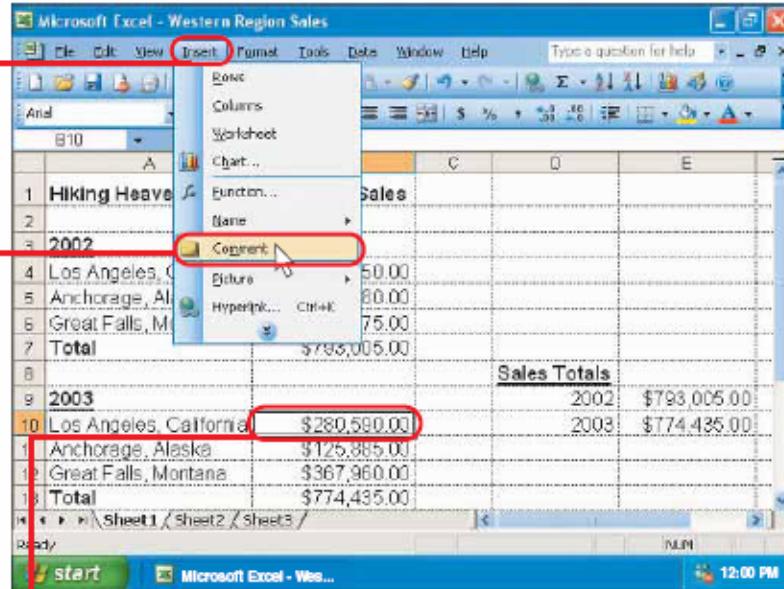

- In this example, we use cells named "Totals" in a function.

 This cell contains the function =**SUM(Totals)** instead of the function =**SUM(E11:E13)**.

*Note: For information on formulas and functions, see pages 82 to 89.*

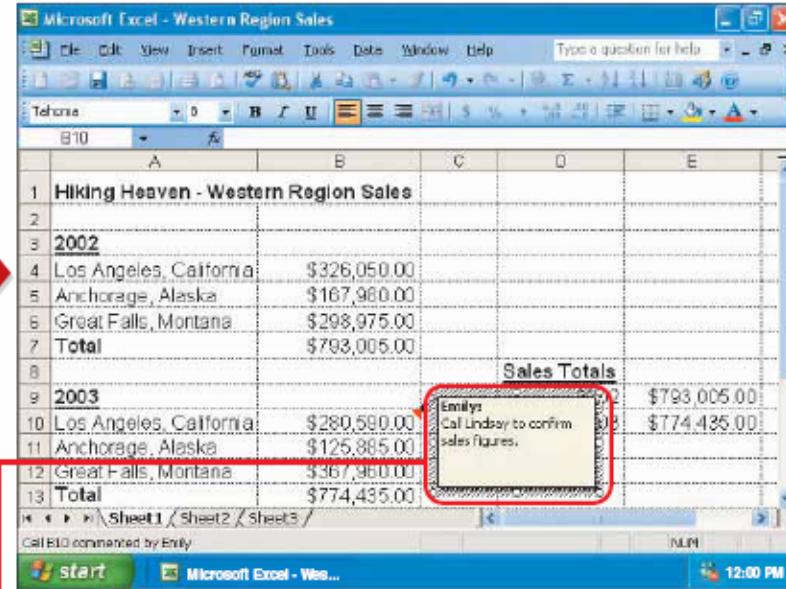

# Dodavanje komentara:

## ADD A COMMENT

- 1 Click the cell you want to add a comment to.
- 2 Click **Insert**.
- 3 Click **Comment**.

*Note: If Comment does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

- 4 A yellow comment box appears, displaying your name.
- 5 When you finish typing your comment, click outside the comment box.

- Korisno je ponekad objasniti ili podsetiti se šta određene ćelije znače i to se postiže ubacivanjem komentara.

# Prikaz i brisanje komentara:

A screenshot of Microsoft Excel showing a sales report for the Western Region. Cell A10 contains the value \$280,580.00. A red triangle icon in the top-left corner of the cell indicates a comment is present. A mouse cursor is hovering over this triangle. A red-bordered callout box with a white background and black border appears, containing the text "Emily: Call Lindsey to confirm sales figures." The Excel ribbon and various menu options are visible at the top.

## DISPLAY A COMMENT

- 1 Position the mouse over the cell containing the comment you want to view.
- 2 Click **Edit**.
- 3 The comment box appears, displaying the comment.
- 4 To hide the comment box, move the mouse outside the cell.

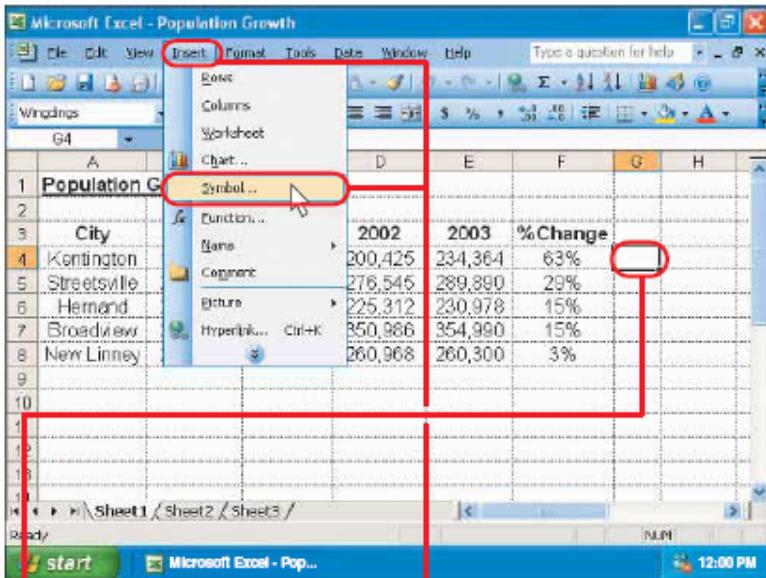

A screenshot of Microsoft Excel showing the same sales report. Cell A10 is selected, and a context menu is open. The "Comments" option in the menu is highlighted with a red box. The menu also includes other options like Undo, Cut, Copy, Paste, and Clear. The red triangle icon in cell A10 is still visible. The Excel ribbon and various menu options are visible at the top.

## DELETE A COMMENT

- 1 Click the cell containing the comment you want to delete.
- 2 Click **Edit**.
- 3 Click **Clear**.
- 4 The red triangle ( ) disappears from the cell.

# Ubacivanje simbola:

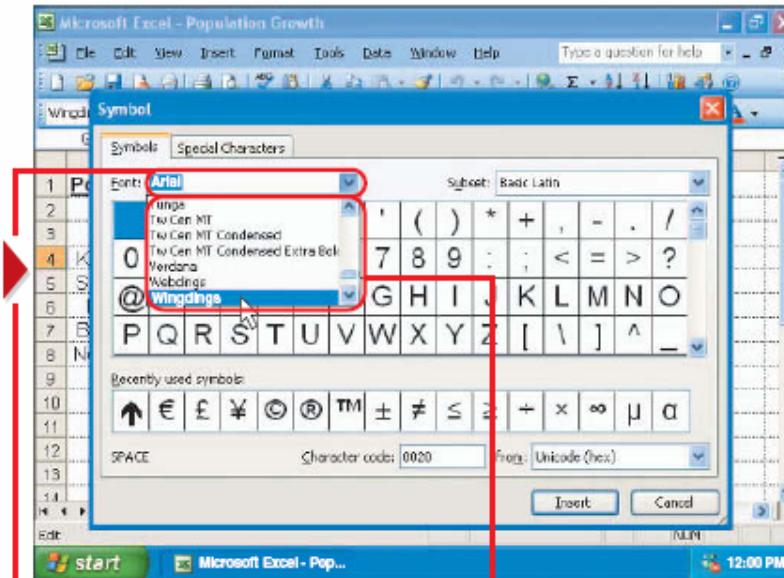

## INSERT SYMBOLS

- 1 Click a cell in your worksheet where you want a symbol to appear.

- 2 Click **Insert**.
- 3 Click **Symbol**.

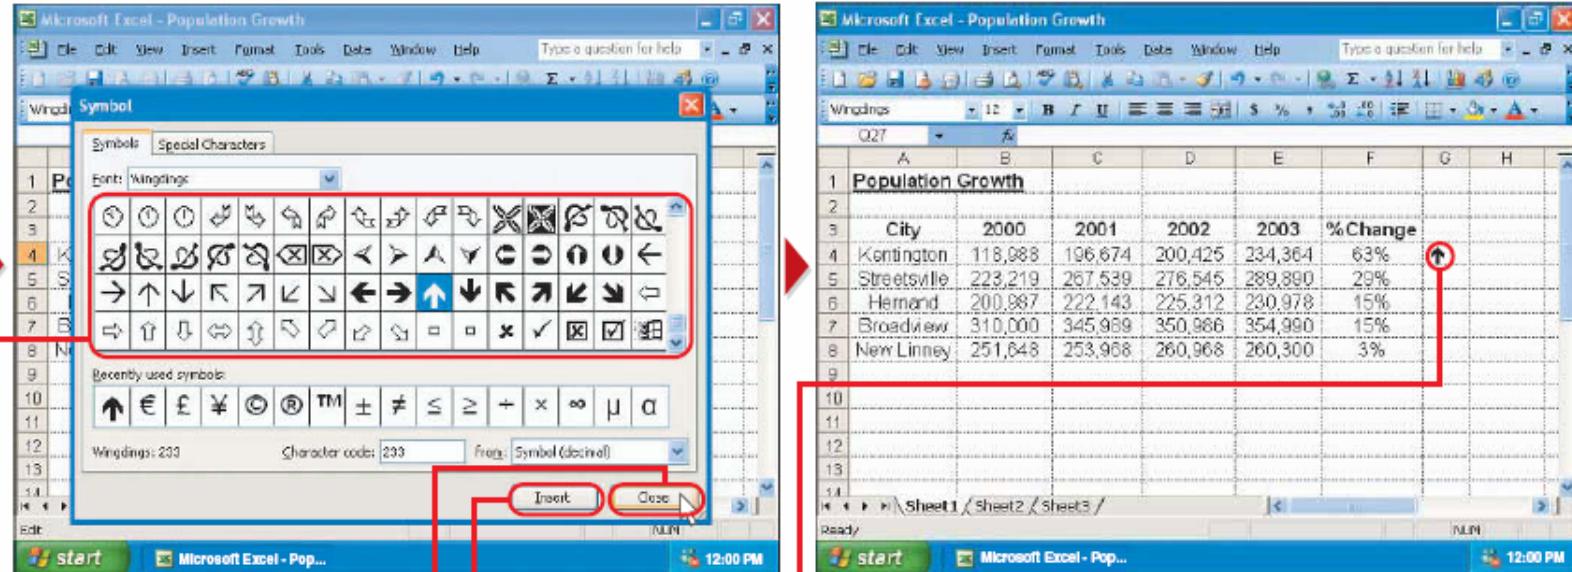

*Note: If Symbol does not appear on the menu, position the mouse  over the bottom of the menu to display the menu option.*

- 4 To display the symbols for another font, click  in this area.
- 5 Click the font that provides the symbols you want to display.

- 6 The Symbol dialog box appears, displaying the symbols for the current font.

# Ubacivanje simbola:

■ The symbols for the font you selected appear in this area.

6 Click the symbol you want to place in your worksheet.

7 Click **Insert** to insert the symbol into your worksheet.

8 Click **Close** to close the Symbol dialog box.

■ The symbol appears in your worksheet.

■ To remove a symbol from your worksheet, double-click the cell displaying the symbol. Then drag the mouse over the symbol until you highlight the symbol and press the **Delete** key.

# Promena širine kolona:

## CHANGE COLUMN WIDTH

	A	B	C	D	E	F	G
1	Hiking Heaven - Sales Report						
2							
3	2003				Sales Total		
4	Chicago, Illinois	\$326,050.00		2003	\$1,113,835.00

3 Click **Delete** to delete the column.

■ The column disappears and all the columns that follow shift to the left.

■ To deselect a column, click any cell.

# Ubacivanje ćelija:

## INSERT CELLS

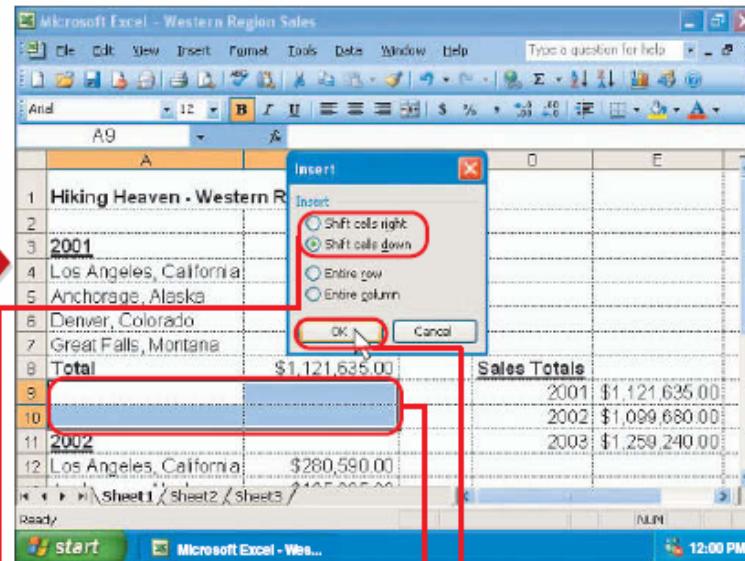

- 1 Select the cells where you want to insert new cells. To select cells, see page 10.

*Note: Excel will insert the same number of cells as you select.*

- 2 Click **Insert**.
- 3 Click **Cells**.

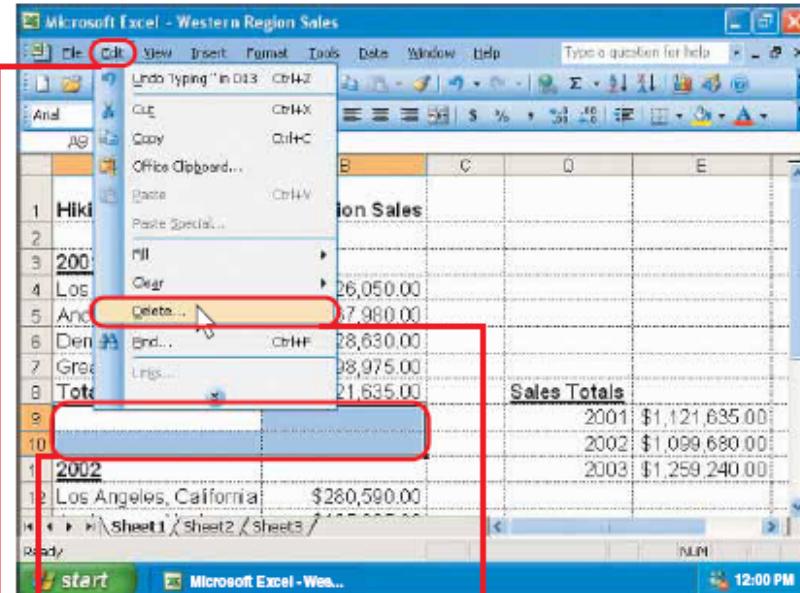

*Note: If Cells does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

- 4 The Insert dialog box appears.
- 5 Click an option to shift the surrounding cells to the right or down to make room for the new cells (  changes to  ).
- 6 Click **OK** to insert the cells.
- 7 Excel inserts the new cells and shifts the surrounding cells in the direction you specified.
- 8 To deselect cells, click any cell.

# Brisanje ćelija:

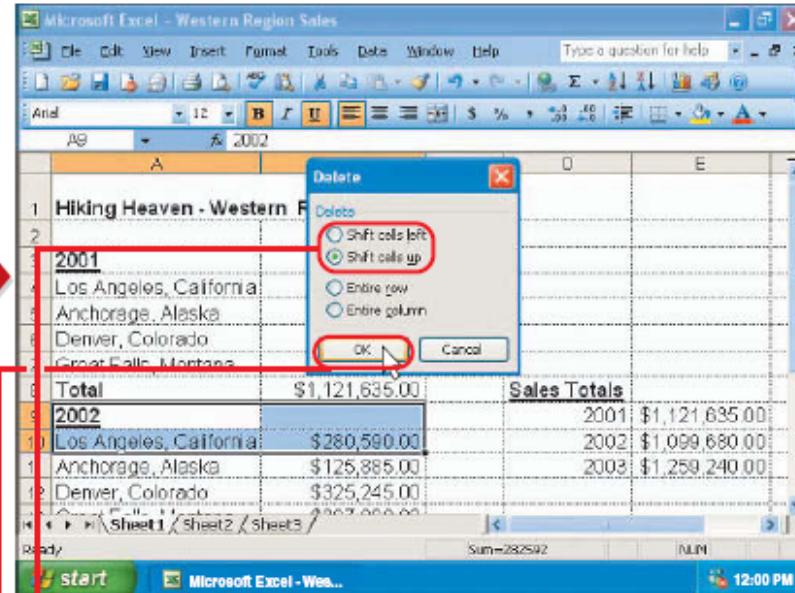

## DELETE CELLS

1 Select the cells you want to delete. To select cells, see page 10.

2 Click **Edit**.

3 Click **Delete**.  
The Delete dialog box appears.

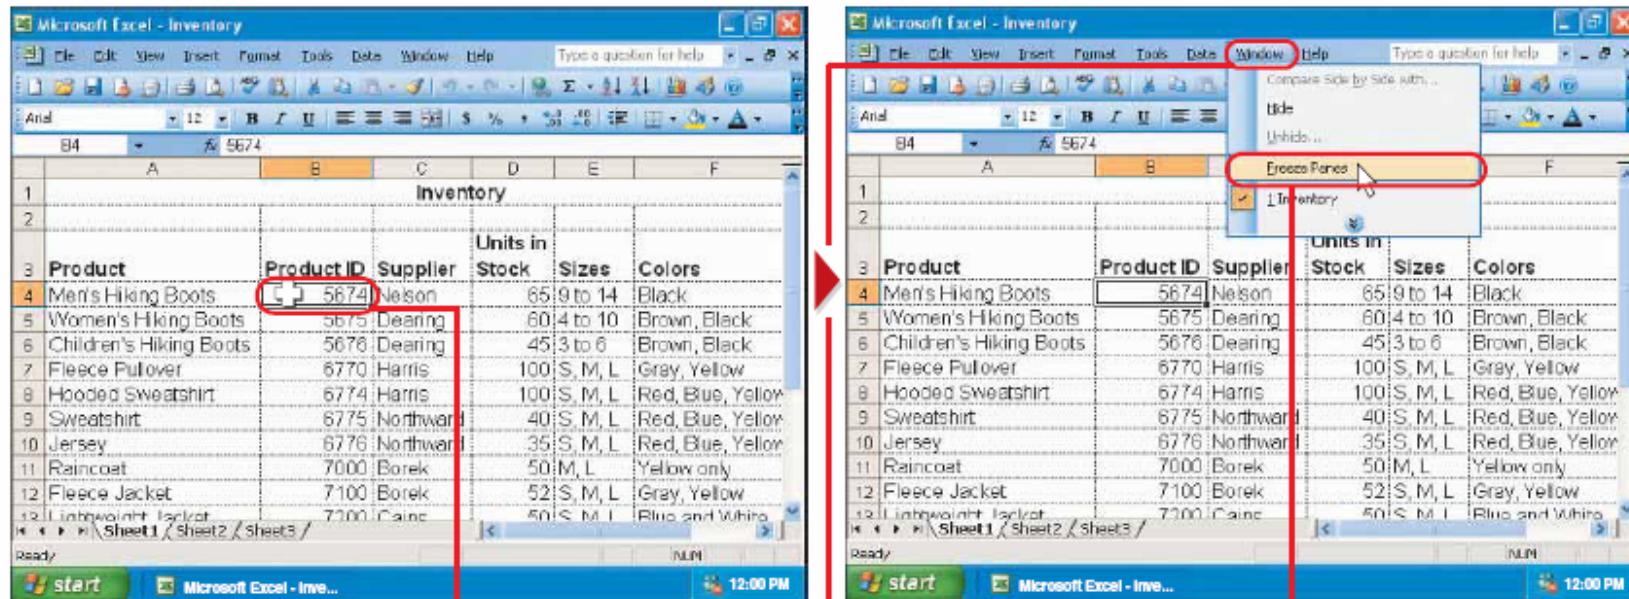

4 Click an option to shift the surrounding cells to the left or up to fill the empty space ( changes to  ).  
5 Click **OK** to delete the cells.

Excel removes the cells and shifts the surrounding cells in the direction you specified.

To deselect cells, click any cell.

# "Zamrzavanje" redova i kolona:

## FREEZE ROWS AND COLUMNS

Excel will freeze the rows above and the columns to the left of the cell you select.

1 To select a cell, click the cell.

2 Click Window.

3 Click Freeze Panes.

- Prilikom rada sa velikim brojem podataka, često je potreno "zamrznuti" redove i kolone koji sadrže nazive određenih grupa podataka.

# "Zamrzavanje" redova i kolona:

The image shows two side-by-side screenshots of Microsoft Excel. Both screenshots display a table titled 'Inventory' with columns for Product, Product ID, Supplier, Units in Stock, Sizes, and Colors. In the first screenshot, a horizontal red arrow points from the left towards the top-left corner of the table. A red box highlights the row containing the column headers (Product, Product ID, Supplier, etc.). Above this row, there is a thin horizontal line, indicating it is frozen. The second screenshot shows the same table after a vertical line has been inserted. A red box highlights the column for 'Supplier'. To the left of this column, there is a thin vertical line, indicating it is frozen. Red arrows point to the scroll bars on both sides of the table, showing how they can be used to move through the data while the frozen rows and columns remain visible.

Inventory					
Product	Product ID	Supplier	Units in Stock	Sizes	Colors
Men's Hiking Boots	5674	Nelson	65	9 to 14	Black

To move through the rows below the dividing line, click or .

# Formule i funkcije u Excelu:

- Koršćenje Excela za izračunavanje podataka uz upotrebu formula i funkcija

# Operatori:

## OPERATORS

A formula can contain one or more operators. An operator specifies the type of calculation you want to perform.

### Arithmetic Operators

You can use arithmetic operators to perform mathematical calculations.

	A	B	
1	5	5	
2			
3	10		=A1+B1

Operator	Description
+	Addition ( $A1+B1$ )
-	Subtraction ( $A1-B1$ )
*	Multiplication ( $A1*B1$ )
/	Division ( $A1/B1$ )
%	Percent ( $A1\%$ )
^	Exponentiation ( $A1^B1$ )

### Comparison Operators

You can use comparison operators to compare two values. Comparison operators return a value of TRUE or FALSE.

	A	B	
1	5	5	
2			
3	TRUE		=A1=B1

Operator	Description
=	Equal to ( $A1=B1$ )
>	Greater than ( $A1>B1$ )
<	Less than ( $A1<B1$ )
$\geq$	Greater than or equal to ( $A1\geq=B1$ )
$\leq$	Less than or equal to ( $A1\leq=B1$ )
$\neq$	Not equal to ( $A1\neq=B1$ )

- Malo se prilagoditi specifičnoj sintaksi koju koristi Excel.

# Redosled operacija:

## ORDER OF CALCULATIONS

When a formula contains more than one operator, Excel performs the calculations in a specific order.

Order of Calculations	
1	Percent (%)
2	Exponentiation (^)
3	Multiplication (*) and Division (/)
4	Addition (+) and Subtraction (-)
5	Comparison operators

A	B
1	2
2	4
3	6
4	8
5	
6	
7	

=A1+A2+A3\*A4  
=2+4+6\*8=54

=A1+(A2+A3)\*A4  
=2+(4+6)\*8=82

=A1\*(A3-A2)+A4  
=2\*(6-4)+8=12

=A2^A1+A3  
=4<sup>2</sup>+6=22

You can use parentheses ( ) to change the order in which Excel performs calculations. Excel will perform the calculations inside the parentheses first.

## CELL REFERENCES

When entering formulas, use cell references instead of actual data whenever possible. For example, enter the formula =A1+A2 instead of =10+20.

When you use cell references and you change a number used in a formula, Excel will automatically redo the calculation for you.

A	B
1	10
2	40
3	

$$=A1+A2=$$

# Funkcije:

## FUNCTIONS

A function is a ready-to-use formula that you can use to perform a calculation on the data in your worksheet.

Examples of commonly used functions include AVERAGE, COUNT, MAX and SUM.

- A function always begins with an equal sign (=).
- The data Excel will use to calculate a function is enclosed in parentheses ( ).

	A	
1	10	=AVERAGE(A1:A4)
2	20	=(10+20+30+40)/4 = 25
3	30	=COUNT(A1:A4) = 4
4	40	=MAX(A1:A4) = 40
5		=SUM(A1:A4)
6		=10+20+30+40 = 100

## Specify Individual Cells

When a comma (,) separates cell references in a function, Excel uses each cell to perform the calculation. For example, =SUM(A1,A2,A3) is the same as the formula =A1+A2+A3.

## Specify a Group of Cells

When a colon (:) separates cell references in a function, Excel uses the specified cells and all cells between them to perform the calculation. For example, =SUM(A1:A3) is the same as the formula =A1+A2+A3.

- Funkcije uvek počinju sa znakom "="
- Podaci koje Excel koristi za proračun naze se u zagradama.

# Unošenje formule:

## ENTER A FORMULA

The screenshot shows a Microsoft Excel spreadsheet titled "Commissions". The formula bar at the top displays "=D6\*B3". The cell D6 contains the value 4200.00 and the cell B3 contains the value 10. The formula bar also shows the formula =D6\*B3.

	A	B	C	D	E	F
1	Sales					
2						
3	Commission (%):	10				
4						
5		Week 1	Week 2	Total	Commission	
6	Ryan	\$2,000.00	\$2,200.00	\$4,200.00	=D6*B3	
7	Kathleen	\$1,500.00	\$1,750.00	\$3,250.00		
8	Lindsay	\$1,750.00	\$1,500.00	\$3,250.00		
9	Maureen	\$2,100.00	\$2,000.00	\$4,100.00		
10	Allan	\$1,800.00	\$1,600.00	\$3,400.00		
11						
12						
13						

1 Click the cell where you want to enter a formula.

2 Type an equal sign (=) to begin the formula.

3 Type the formula and then press the **Enter** key.

*Note: As you enter the formula, Excel adds a colored outline to each cell you refer to in the formula.*

The screenshot shows the same Microsoft Excel spreadsheet after the formula has been entered. The cell D6 now contains the result \$420.00. The formula bar still displays the formula =D6\*B3.

	A	B	C	D	E	F
1	Sales					
2						
3	Commission (%):	10				
4						
5		Week 1	Week 2	Total	Commission	
6	Ryan	\$2,000.00	\$2,200.00	\$4,200.00	\$420.00	
7	Kathleen	\$1,500.00	\$1,750.00	\$3,250.00		
8	Lindsay	\$1,750.00	\$1,500.00	\$3,250.00		
9	Maureen	\$2,100.00	\$2,000.00	\$4,100.00		
10	Allan	\$1,800.00	\$1,600.00	\$3,400.00		
11						
12						
13						

4 The result of the calculation appears in the cell.

5 To view the formula you entered, click the cell containing the formula.

6 The formula bar displays the formula for the cell.

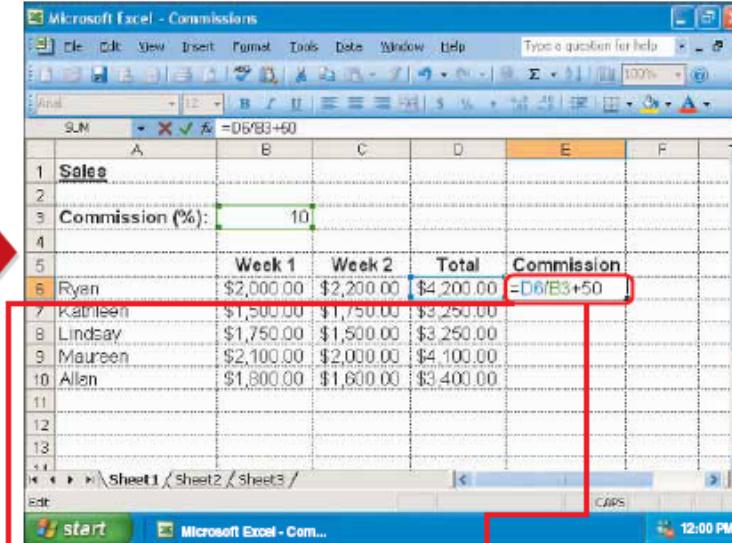

# Editovanje formule:

## EDIT A FORMULA

- Double-click the cell containing the formula you want to change.  
The formula appears in the cell.

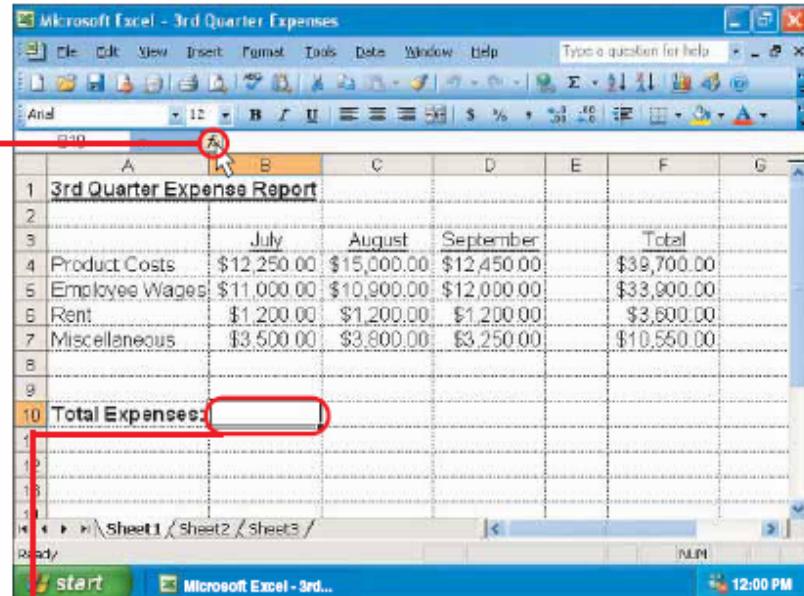

Excel outlines each cell used in the formula with a different color.

- Press the **←** or **→** key to move the flashing insertion point to where you want to remove or add characters.  
To remove the character to the left of the insertion point, press the **Backspace** key.
- To add data where the insertion point flashes on your screen, type the data.
- When you finish making changes to the formula, press the **Enter** key.

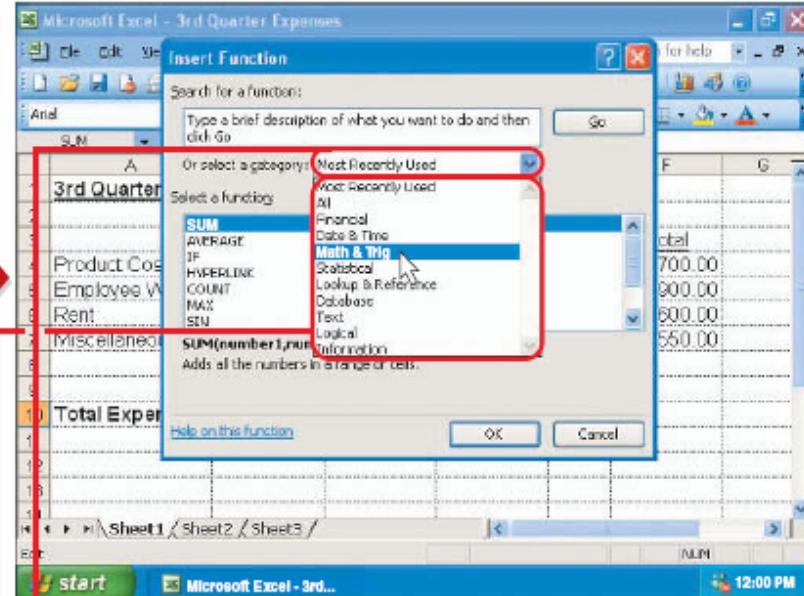

# Rad sa funkcijama:

## ENTER A FUNCTION

- 1 Click the cell where you want to enter a function.
- 2 Click to enter a function.

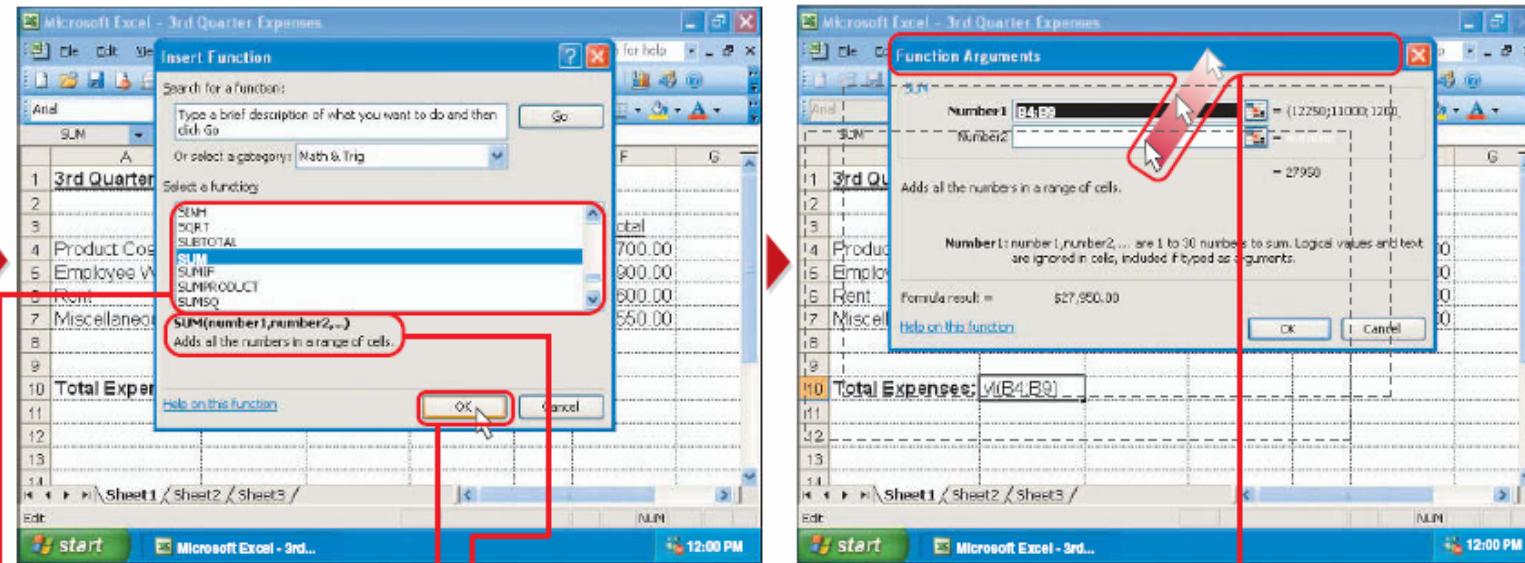

The Insert Function dialog box appears.

- 3 Click this area to display the categories of available functions.
- 4 Click the category containing the function you want to use.

Note: If you do not know which category contains the function you want to use, select All to display a list of all the functions.

# Rad sa funkcijama:

- This area displays the functions in the category you selected.
- 5 Click the function you want to use.

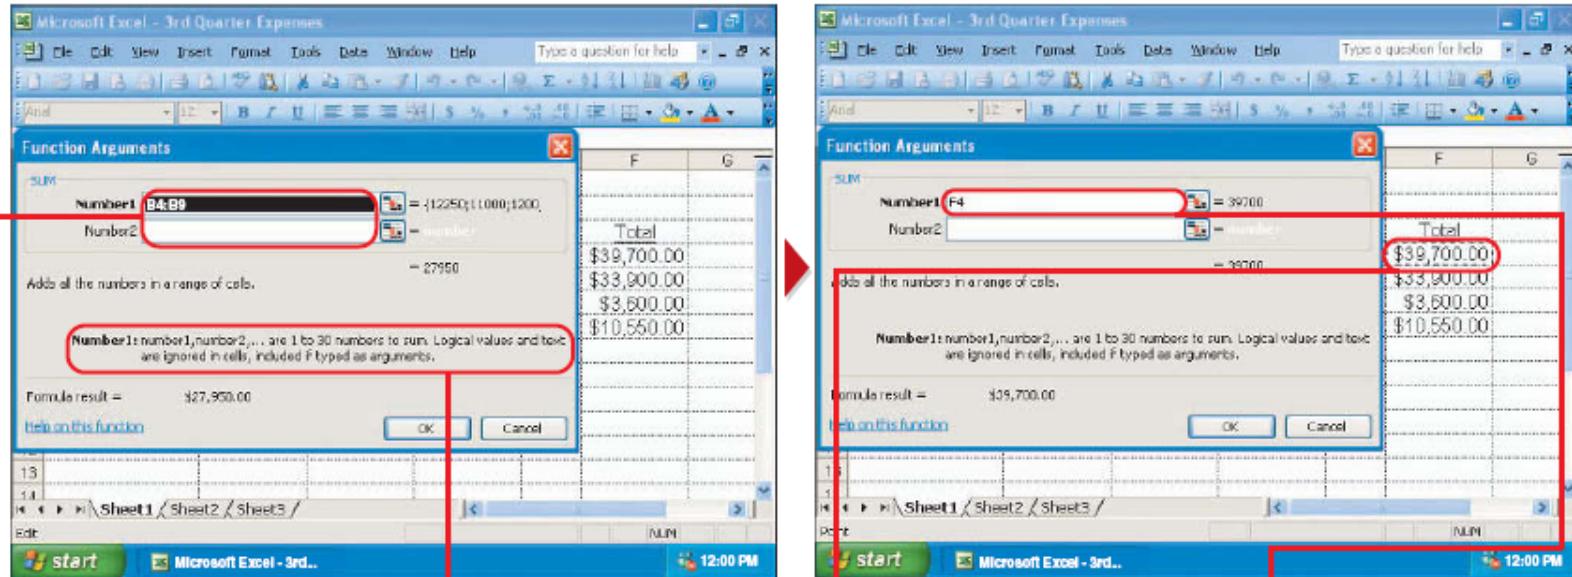

- This area describes the function you selected.
- 6 Click **OK** to continue.

- The Function Arguments dialog box appears. If the dialog box covers data you want to use in the function, you can move the dialog box to a new location.

- Mora se uvek napisati u odnosu na koje podatke se funkcija primenjuje.

# Rad sa funkcijama:

## ENTER A FUNCTION (CONTINUED)

This area displays boxes where you enter the numbers you want to use in the function.

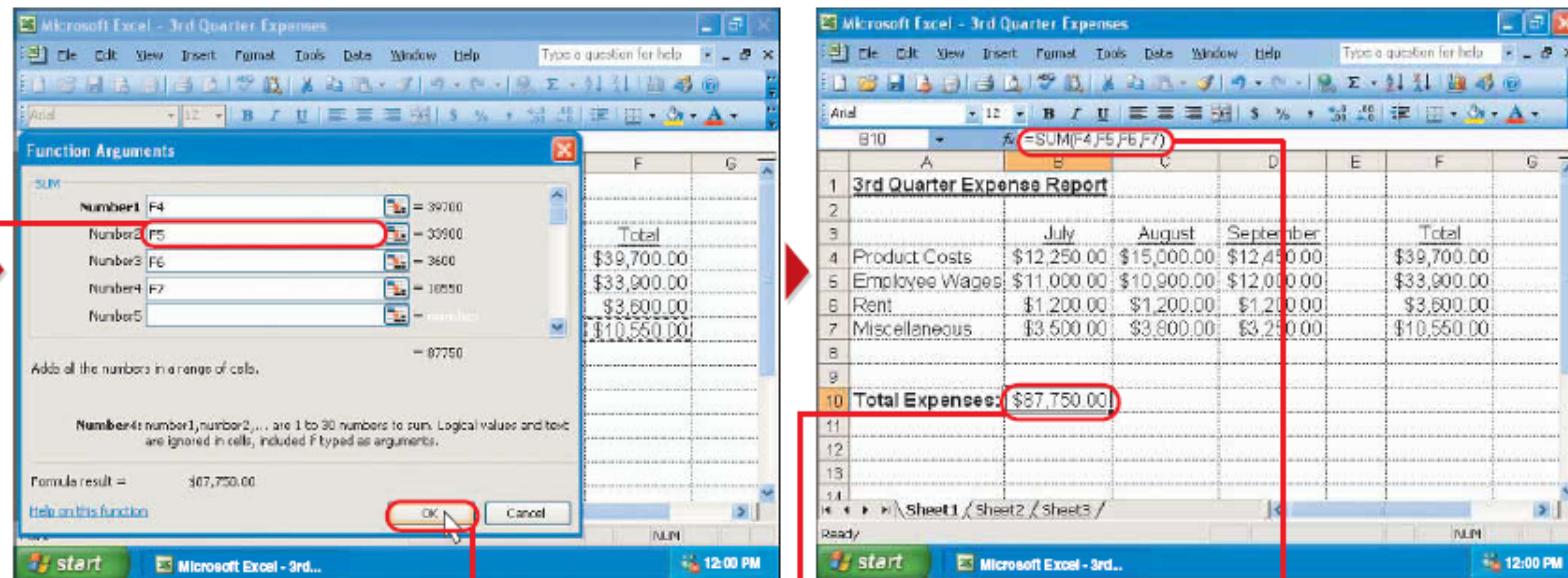

This area describes the numbers you need to enter.

8 To enter the first number for the function, click the cell that contains the number.

*Note: If the number you want to use does not appear in your worksheet, type the number.*

The cell reference for the number appears in this area.

# Rad sa funkcijama:

9 To enter another number for the function, click the next box.

10 Repeat steps 8 and 9 until you have entered all the numbers you want to use in the function.

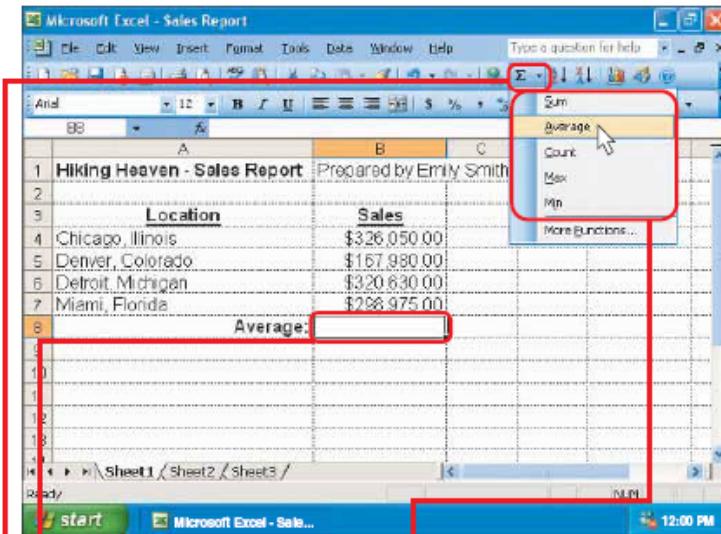

11 Click **OK** to enter the function into your worksheet.

The result of the function appears in the cell.

The formula bar displays the function for the cell.

# Izvođenje osnovnih operacija:

## PERFORM COMMON CALCULATIONS

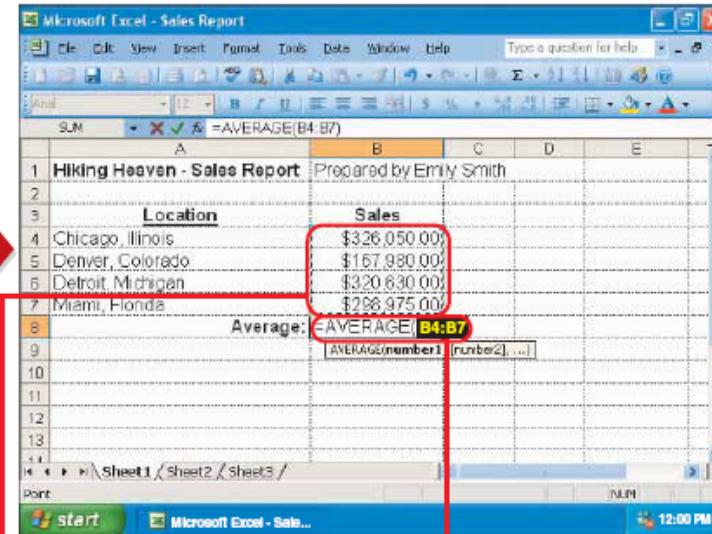

- 1 Click the cell below or to the right of the cells containing the numbers you want to include in the calculation.
- 2 Click in this area to display a list of common calculations.

Note: If is not displayed, click on the Standard toolbar to display the button.

- 3 Click the calculation you want to perform.

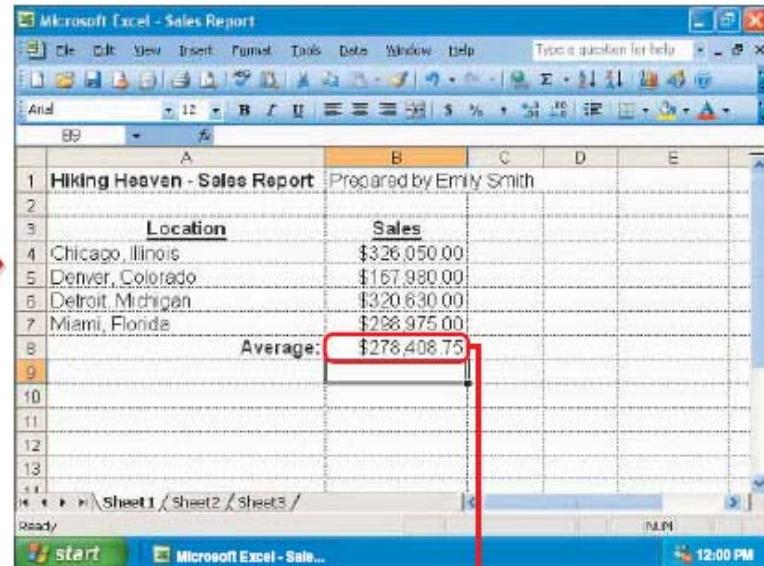

Note: If you want to quickly add the numbers, you can click instead of performing steps 2 and 3.

- A moving outline appears around the cells that Excel will include in the calculation.
- If Excel outlines the wrong cells, you can select the cells that contain the numbers you want to include in the calculation. To select cells, see page 10.

- The cell you selected in step 1 displays the function Excel will use to perform the calculation.

# Izvođenje osnovnih operacija:

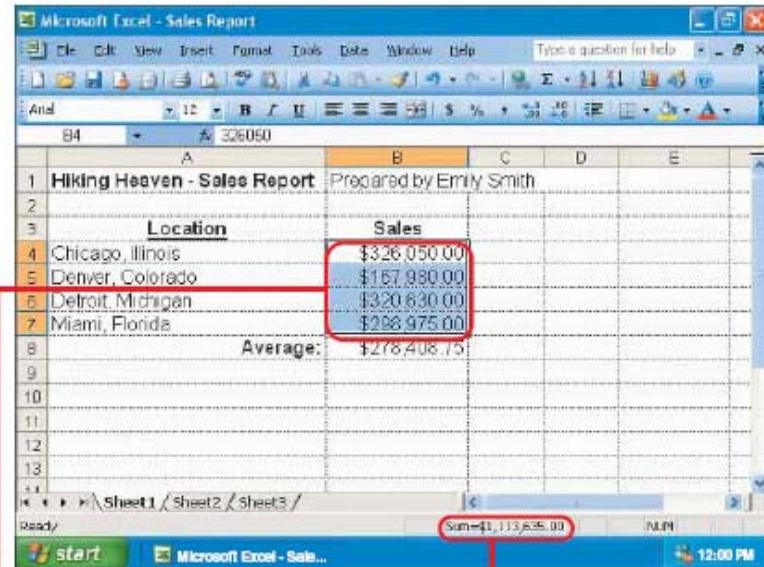

4 Press the **Enter** key to perform the calculation.

The result of the calculation appears.

Sum	Adds a list of numbers.
Average	Calculates the average value of a list of numbers.
Count	Calculates the number of values in a list.
Max	Finds the largest value in a list of numbers.
Min	Finds the smallest value in a list of numbers.

- Značenje ponuđenih osnovnih operacija.

## QUICKLY ADD NUMBERS

You can quickly display the sum of a list of numbers without entering a formula into your worksheet.

1 Select the cells containing the numbers you want to add. To select cells, see page 10.

This area displays the sum of the cells you selected.

- Desnim klikom možemo izabrati vrstu brzog pokaza

# Kopiranje formula:

## COPY A FORMULA—USING RELATIVE REFERENCES

3 Position the mouse over the bottom right corner of the cell ( changes to ).

4 Drag the mouse over the cells you want to receive a copy of the formula.

# Kopiranje formula:

The image consists of two side-by-side screenshots of Microsoft Excel. In the left screenshot, cell B9 contains the formula  $=B5+B6+B7+B8$ . The range B5:B8 is highlighted with a red box, and the Auto Fill Options button (a small square with four arrows) is visible at the bottom right of the selection. In the right screenshot, cell C9 contains the formula  $=C5+C6+C7+C8$ . The range C5:C8 is highlighted with a red box. Both screenshots show a table with columns labeled A through F and rows labeled 1 through 9, containing sales data for January through April.

Sales						
	2000	2001	2002	2003		
January	\$8,528.00	\$8,959.00	\$9,285.00	\$10,261.00		
February	\$9,037.00	\$9,320.00	\$9,714.00	\$10,462.00		
March	\$8,519.00	\$9,017.00	\$9,531.00	\$10,058.00		
April	\$8,852.00	\$9,156.00	\$9,850.00	\$10,182.00		
<b>Totals</b>	<b>\$35,036.00</b>	<b>\$36,452.00</b>	<b>\$38,380.00</b>	<b>\$40,943.00</b>		

The results of the formulas appear.

The Auto Fill Options button also appears. You can click the button and then select an option to change the way Excel copies the formula. For example, you can specify that Excel should not use the formatting from the original cell.

5 To view one of the new formulas, click a cell that received a copy of the formula.

The formula bar displays the formula with the new cell references.

# Kopiranje formula - absolutna referenca:

## What is an absolute reference?

An absolute reference is a cell reference that does not change when you copy a formula. To make a cell reference absolute, type a dollar sign (\$) before both the column letter and row number, such as \$A\$7.

	A	B	C	D	
1		Jason	Sarah	Kerrie	
2	Sales	10,000	7,500	8,200	
3					
4	Commission	2,000	1,500	1,640	
5					
6	Commission Rate				
7		0.2			

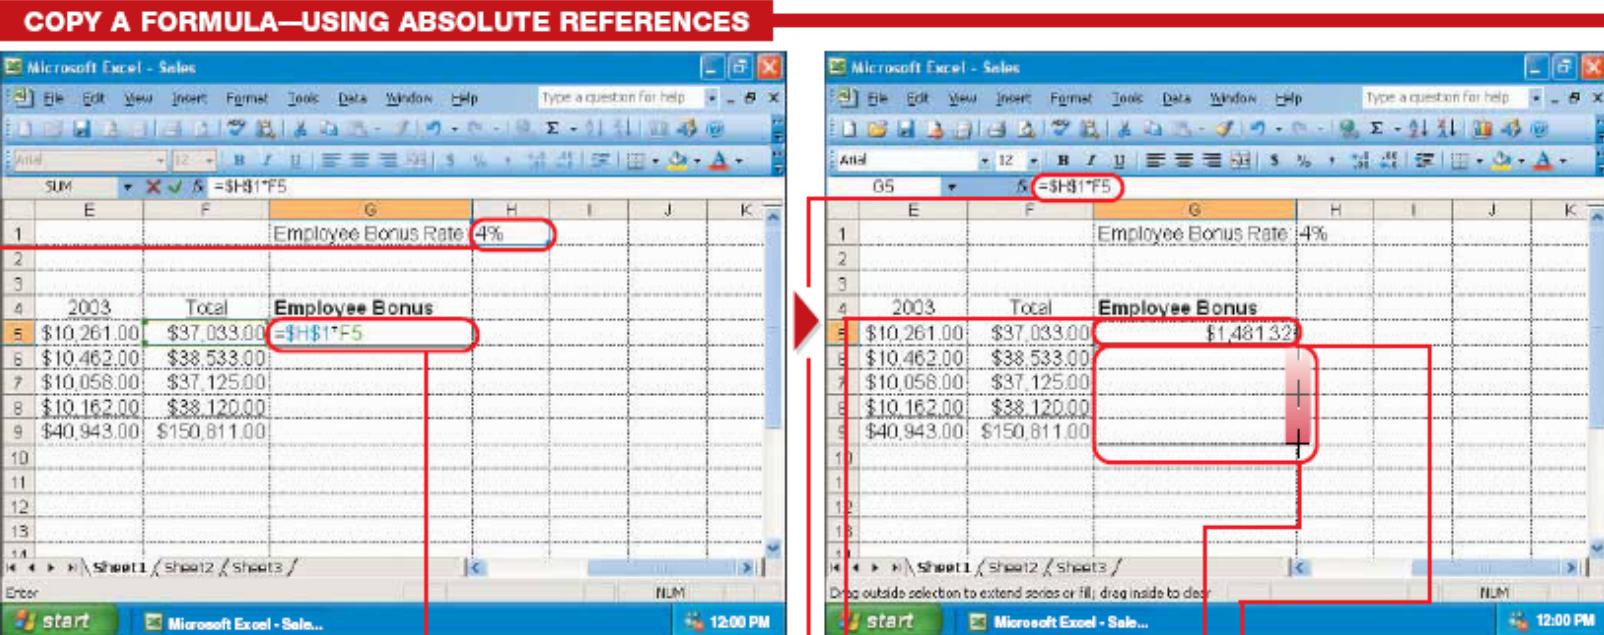

The diagram illustrates the concept of absolute referencing. Cell A7 contains the formula  $=\$A\$7*B2$ . This formula uses absolute references (\$A\$7 and \$B2) to ensure that when the formula is copied to other cells, the reference remains constant. For example, when copied to C7, it becomes  $=\$A\$7*C2$ , and when copied to D7, it becomes  $=\$A\$7*D2$ . A lock icon on the formula bar indicates that the reference is absolute. Red arrows point from the formulas to their respective cells in the table.

This cell contains  
the formula  
 $=\$A\$7*B2$ .

When you copy the formula to other  
cells in your worksheet, Excel does  
not change the absolute reference  
in the new formulas.

Absolutna referenca predstavlja ćeliju koja se ne menja kada se nad njom izvršava neka računska operacija. Absolutnu referencu upisujemo sa znakom \$ ispred slova od kolone i broja reda (relativne reference su promenljive ćelije).

# Kopiranje formula - absolutna referenca:

1 Enter the data you want to use in all the formulas.

2 Enter the formula you want to copy to other cells. To enter a formula, see page 84.

3 Click the cell containing the formula you want to copy.

The formula bar displays the formula for the cell.

4 Position the mouse over the bottom right corner of the cell ( changes to ).

5 Drag the mouse over the cells you want to receive a copy of the formula.

# Kopiranje formula - absolutna referenca:

The figure consists of two side-by-side screenshots of Microsoft Excel. Both screenshots show a spreadsheet with columns E through K and rows 1 through 14. Column E contains employee names, column F contains total sales, column G contains the formula `=$H$1*F5`, and column H contains the calculated employee bonuses.

**Screenshot 1 (Left):** The formula bar shows `=SH1*F5`. Cell G5 displays the result `$1,481.32`. A red box highlights the range G5:H9, and a red arrow points from this box to the status bar at the bottom of the screen, which shows the formula `=SH1*F5`.

**Screenshot 2 (Right):** The formula bar shows `=SH1*F7`. Cell G7 displays the result `$1,485.00`. A red box highlights the range G5:H9, and a red arrow points from this box to the status bar at the bottom of the screen, which shows the formula `=SH1*F7`.

	E	F	G	H	I	J	K
1			Employee Bonus Rate	4%

■ The formulas appear  
in your worksheet.

■ Excel automatically  
adjusts the column widths  
to clearly display the  
formulas.

■ To once again show  
the formula results in your  
worksheet, repeat steps 1  
to 5 ( changes to  in step 4).

Lakši metod (koji se zaboravlja).

# Česte greške u pisanju formula:

## COMMON ERRORS IN FORMULAS

An error message appears when Excel cannot properly calculate or display the result of a formula.

A	B	C
1 9924		
2 5521		
3 #####		
4		
5		
6		
7		

#####

The column is too narrow to display the result of the calculation. You can change the column width to display the result. To change the column width, see page 66.  
This cell contains the formula =A1\*A2

A	B	C
1 50		
2		
3		
4 #DIV/0!		
5		
6		
7		

#DIV/0!

The formula divides a number by zero (0). Excel considers a blank cell to have a value of zero.  
This cell contains the formula =A1/A2  
=50/0

A	B	C
1 10		
2 20		
3 30		
4 #NAME?		
5		
6		
7		

#NAME?

The formula contains a function name or cell reference Excel does not recognize.  
This cell contains the formula =AQ+A2+A3  
In this example, the cell reference A1 was typed incorrectly.

A	B	C
1 10		
2 20		
3 30		
4 #REF!		
5		
6		
7		

#REF!

The formula refers to a cell that is not valid.  
This cell contains the formula =A1+A2+A3  
In this example, a row containing a cell used in the formula was deleted.

A	B	C
1 10		
2 20		
3 January		
4 #VALUE!		
5		
6		
7		

#VALUE!

The formula refers to a cell that Excel cannot use in a calculation.  
This cell contains the formula =A1+A2+A3  
In this example, a cell used in the formula contains text.

Microsoft Excel		
Important! Office Excel cannot calculate a formula. Cell references in the formula refer to cells that no longer exist. Try one of the following:		
• If you accidentally created a formula reference, click OK. This removes the formula and helps fix the formula.	OK	Cancel
• If you want to keep the formula, click Help for more information about circular references and how to work with them. Microsoft Office Help is located on the ribbon under Help.		
To continue using the formula, click OK.		

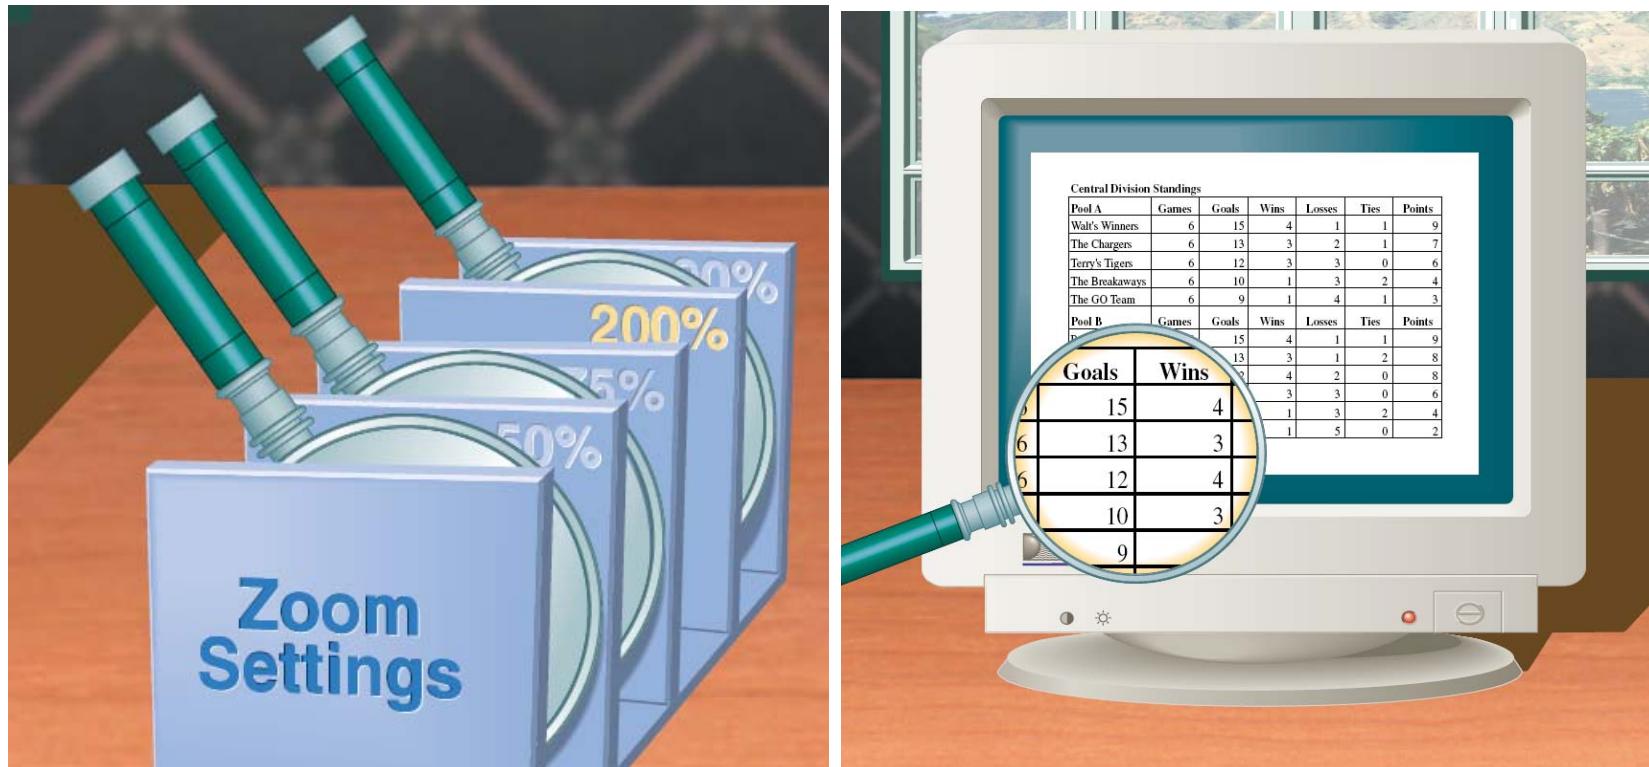

Circular Reference

A warning message appears when a formula refers to the cell containing the formula. This is called a circular reference.  
This cell contains the formula =A1+A2+A3+A4

## Greške:

- 2 Click **Format**.
- 3 Click **Cells**.

■ The Format Cells dialog box appears.

# "Zaokretanje" teksta unutar ćelije:

4 Click the **Alignment** tab.

5 Click **Wrap text**

( changes to ).

6 Click **OK** to confirm your change.

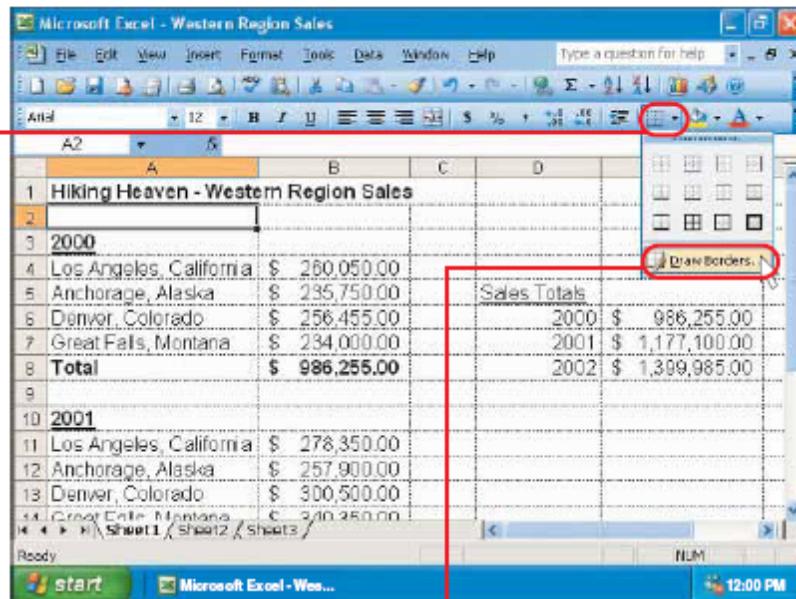

The text wraps within the cells you selected.

Excel automatically adjusts the row heights to fit the wrapped text.

To deselect cells, click any cell.

# Dodavanje bordure:

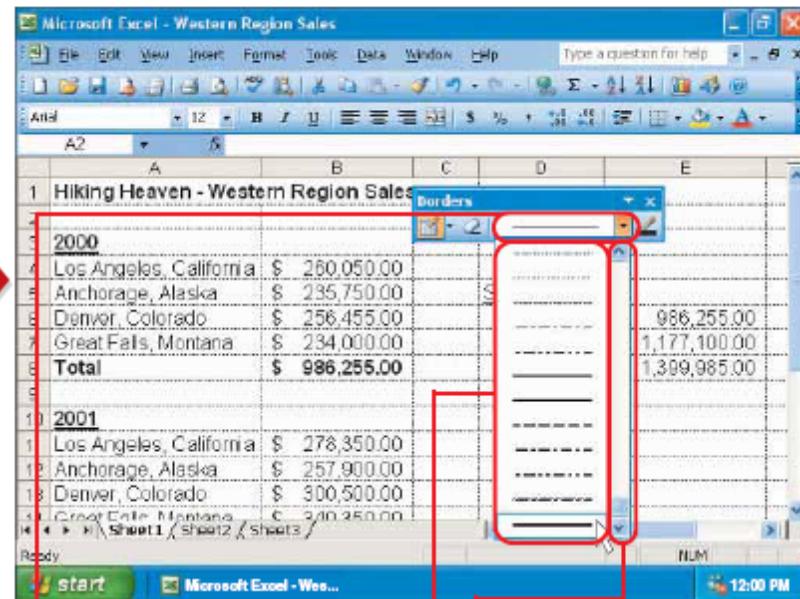

## ADD BORDERS TO CELLS

1 Click ▾ in this area.

2 Click **Draw Borders**.

The Borders toolbar appears.

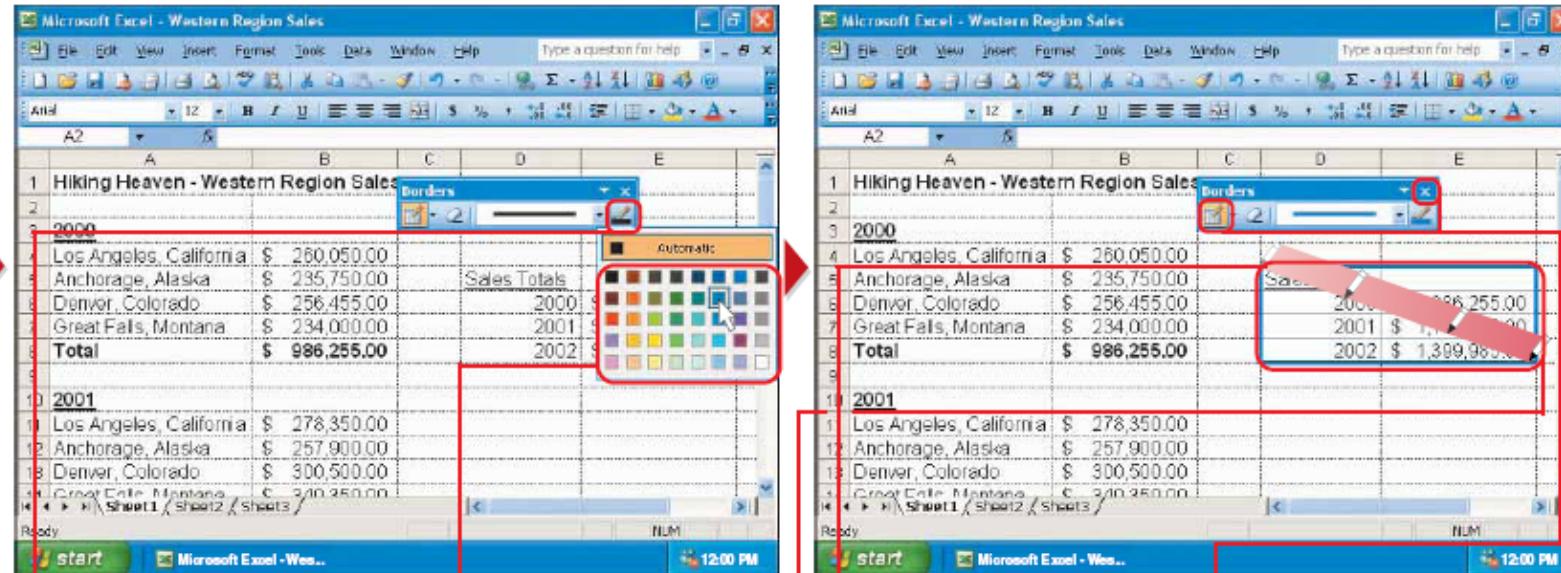

3 To select a line style for the border, click this area.

You can use the scroll bar to browse through the available line styles.

4 Click the line style you want to use.

# Bojenje bordure:

5 To select a color for the border, click .

6 Click the color you want to use.

7 Position the mouse  where you want the border to begin.

8 Drag the mouse  to where you want the border to end.

The border appears.

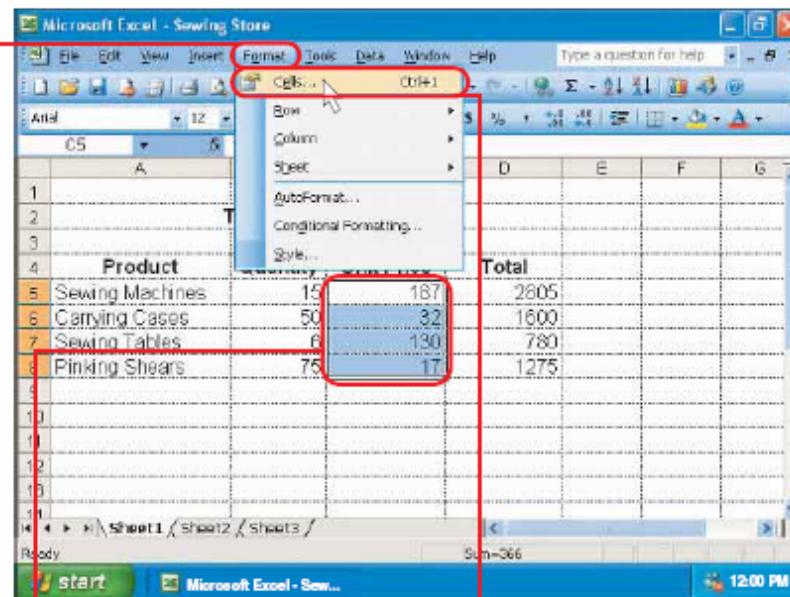

■ You can repeat steps 7 and 8 for each border you want to add.

■ When you finish adding borders, click .

■ To hide the Borders toolbar, click .

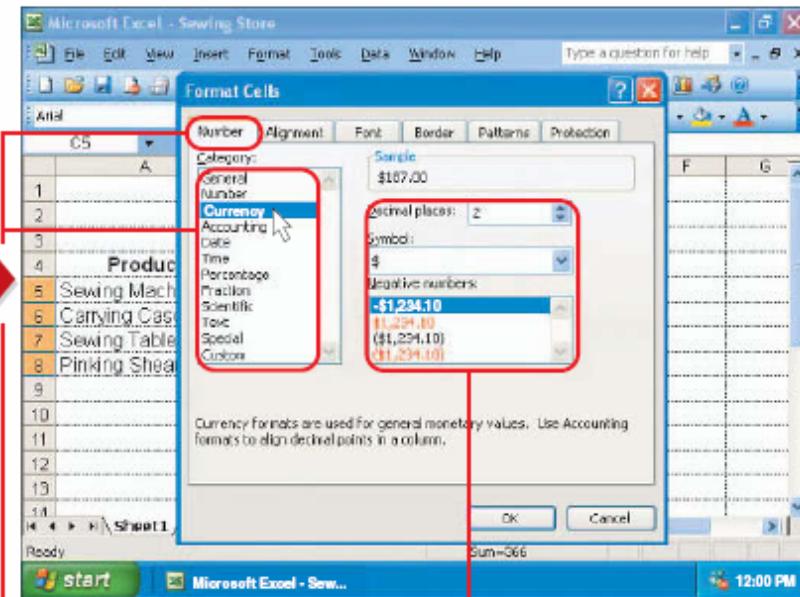

# Promena formata brojeva:

## CHANGE NUMBER FORMAT

- 1 Select the cells containing the numbers you want to format. To select cells, see page 10.
- 2 Click **Format**.

- 3 Click **Cells**.  
The Format Cells dialog box appears.

- 4 Click the **Number** tab.
- 5 Click the category that describes the numbers in the cells you selected.
- This area displays the options for the category you selected. The available options depend on the category you selected.

# Promena formata brojeva:

The screenshot shows two windows of Microsoft Excel. On the left, the 'Format Cells' dialog box is open, specifically the 'Number' tab under the 'Currency' category. It displays a sample value '\$187.00', a 'Decimal places:' input field set to 2, and a 'Negative numbers:' dropdown menu containing options like '\$1,234.10', '%1.234,10', '(\$1,234.10)', and '(\$1.234,10)'. A red arrow points from the bottom-left of the dialog to the right side of the screen. On the right, a spreadsheet titled 'The Sewing Store' is shown with four columns: Product, Quantity, Unit Price, and Total. The 'Total' column contains values like 2805, 1500, 780, and 1275. A red box highlights the 'Total' column. Above the spreadsheet, the formula bar shows '=B5\*C5'. Another red arrow points from the bottom-right of the dialog to the right side of the screen.

Product	Quantity	Unit Price	Total
Sewing Machines	15	\$187.00	2805
Carving Cases	50	\$32.00	1500
Sewing Tables	6	\$130.00	780
Pinking Shears	75	\$17.00	1275

6 To select the number of decimal places you want the numbers to display, double-click this area. Then type the number of decimal places.

7 To select the way you want negative numbers to appear, click one of the available styles.

This area displays a sample of how the numbers will appear.  
8 Click **OK** to apply your changes.

The numbers display the changes you specified.

#### QUICKLY FORMAT NUMBERS

1 Select the cells containing the numbers you want to format.

2 Click one of the following buttons.

Currency

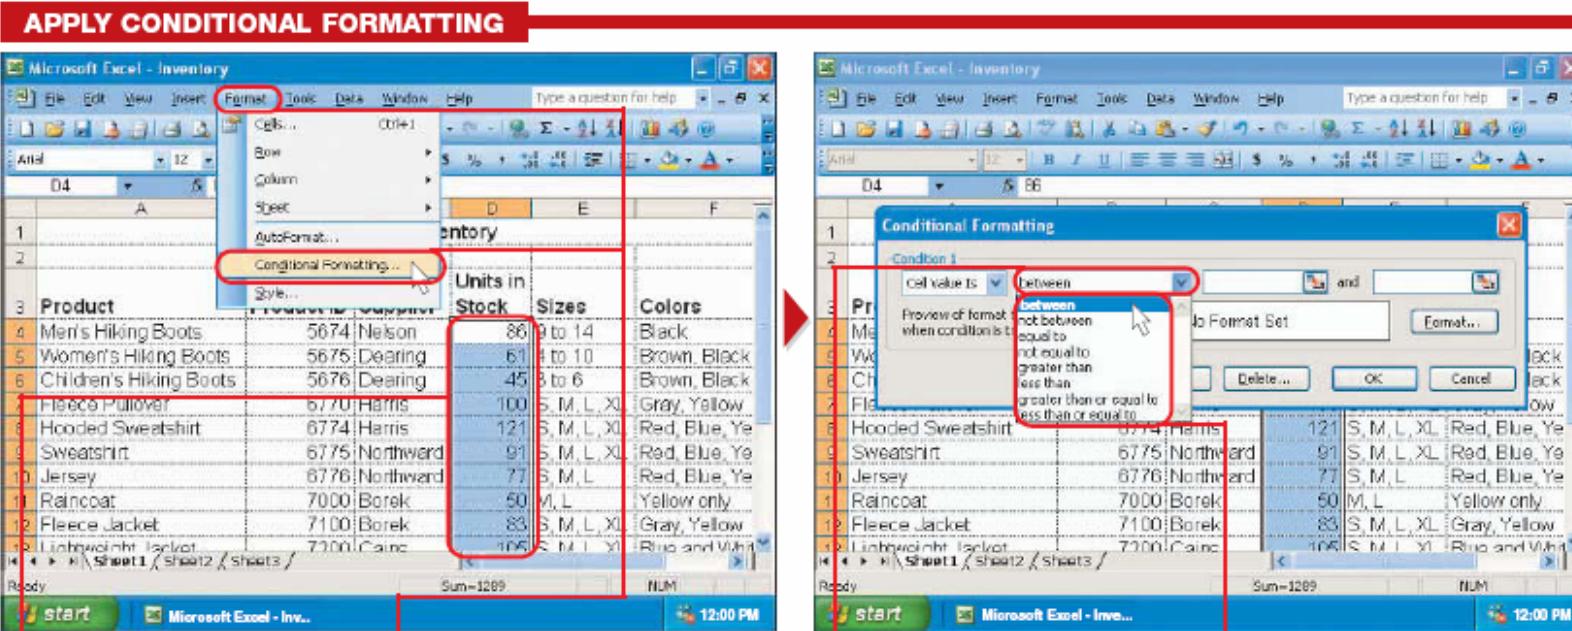

Percent

Comma

Add a decimal place

Remove a decimal place

# Uslovno formatiranje:

1 Select the cells containing the data you want Excel to format when the data meets a condition. To select cells, see page 10.

- 2 Click **Format**.  
3 Click **Conditional Formatting**.

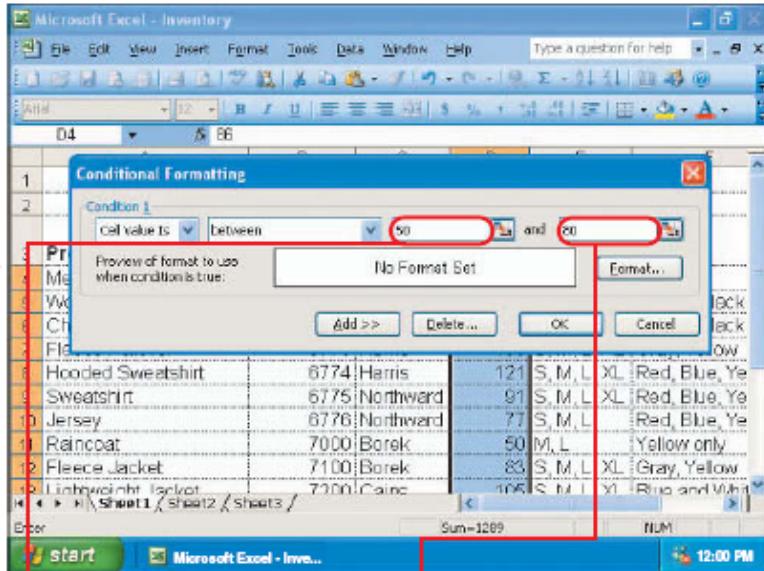

■ The Conditional Formatting dialog box appears.

- 4 Click this area to select an operator for the condition.

- 5 Click the operator you want to use.

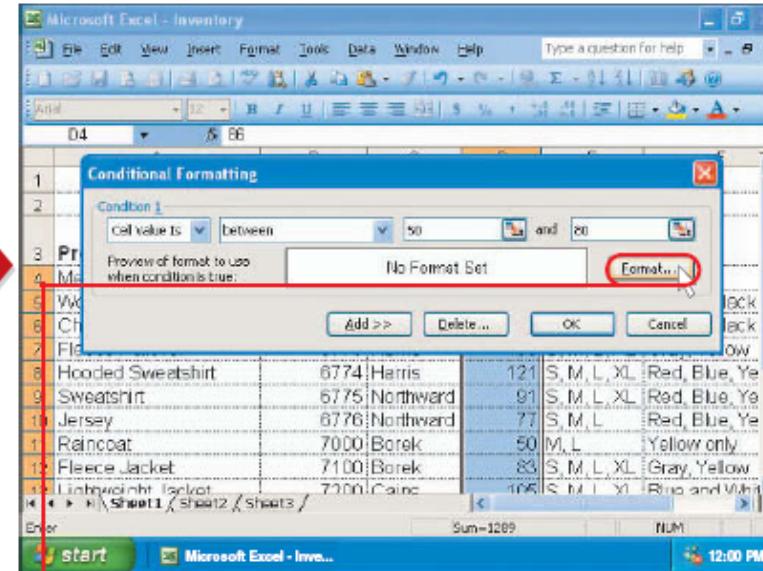

Na primer, kada broj u ćeliji padne ispod broja 10, neka Excel prikaže taj broj kao crven.

# Uslovno formatiranje:

6 Click this area and type the value you want to use for the condition.

7 If you selected **between** or **not between** in step 5, click this area and type the second value.

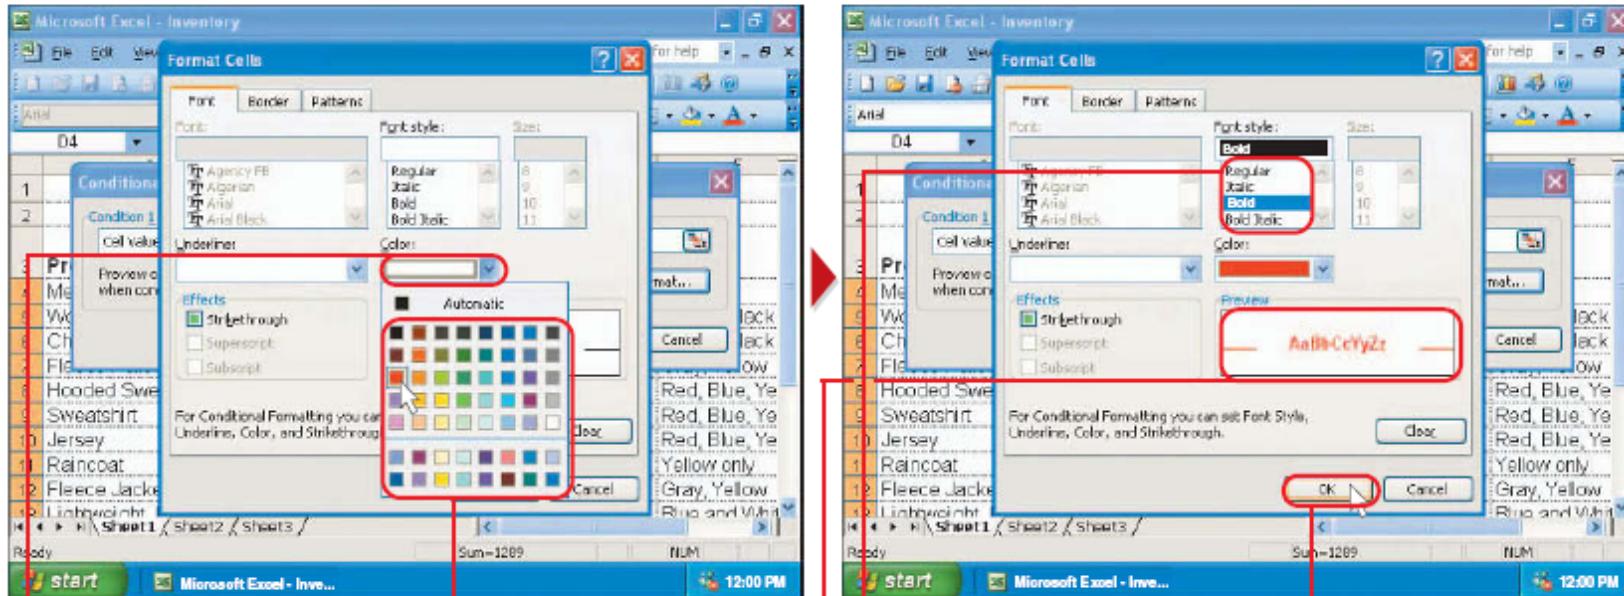

8 Click **Format** to specify how you want to format the data when the data meets the condition.

■ The Format Cells dialog box appears.

Šta je operator ? Operator govori Excelu kako da poredi podatke u ćeliji sa brojem koji je određen u uslovu. Na primer, operator "greather than" govori Excel-u da proveri da li je broj u ćeliji veći od nekog broja.

# Uslovno formatiranje:

## APPLY CONDITIONAL FORMATTING (CONTINUED)

9 To select a color for the data, click this area to display the available colors.

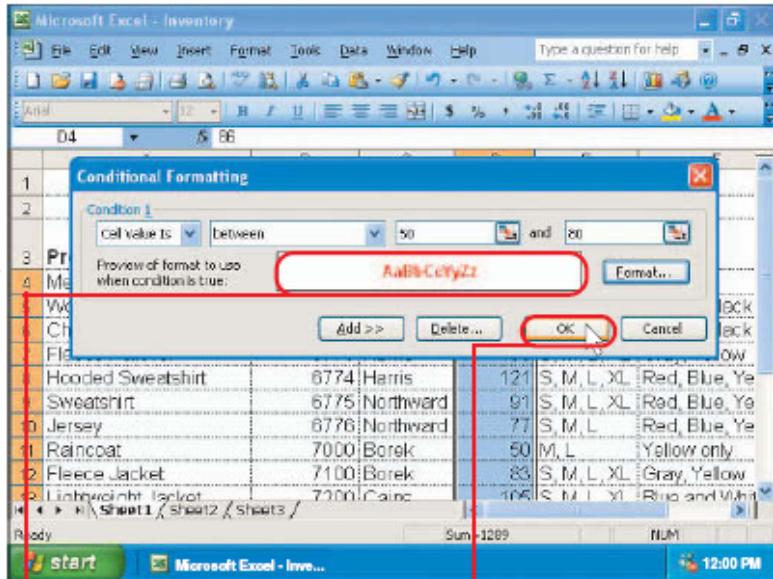

10 Click the color you want to use.

11 To select a style for the data, click the style you want to use.

12 This area displays a preview of the options you selected.

12 Click **OK** to confirm your changes.

# Uslovno formatiranje:

This area displays how data that meets the condition will appear in your worksheet.

13 Click **OK** to apply the condition to the cells you selected.

Inventory						
Product	Product ID	Supplier	Units in Stock	Sizes	Colors	
Men's Hiking Boots	5674	Nelson	86	S to 14	Black	
Women's Hiking Boots	5675	Dearing	61	S to 10	Brown, Black	
Children's Hiking Boots	5676	Dearing	45	S to 6	Brown, Black	
Hooded Sweatshirt	6774	Harris	121	S, M, L, XL	Red, Blue, Ye

4 A dashed line appears on your screen. This line indicates where one page ends and another begins.

5 The dashed line will not appear when you print your worksheet.

6 To deselect a row or column, click any cell.

Zgodno je kada se štampaju tabele: Pogledati na "Print Preview" rezultat.

# Dodavanje zaglavlja:

- 1 Click **View**.
- 2 Click **Header and Footer**.

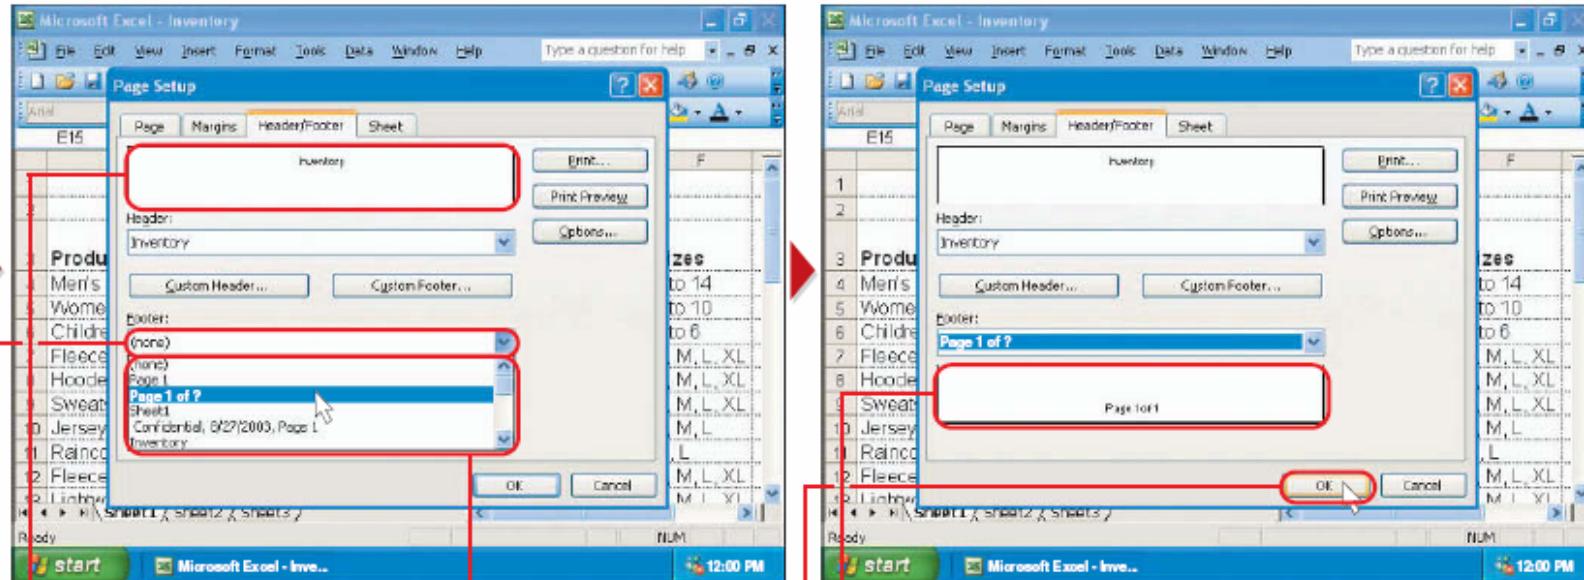

*Note: If Header and Footer does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

■ The Page Setup dialog box appears.

- 3 To view a list of available headers, click this area.

- 4 Click the header you want to use.

# Dodavanje zaglavlja:

This area displays how the header will appear at the top of a page.

5 To view a list of available footers, click this area.

6 Click the footer you want to use.

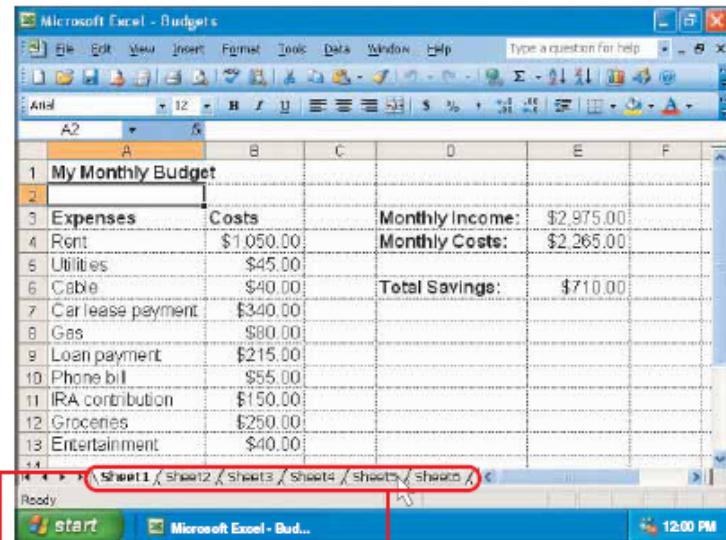

This area displays how the footer will appear at the bottom of a page.

7 Click **OK** to add the header or footer to your worksheet.

To remove a header or footer from your worksheet, repeat steps 1 to 7, selecting **(none)** in step 4 or step 6.

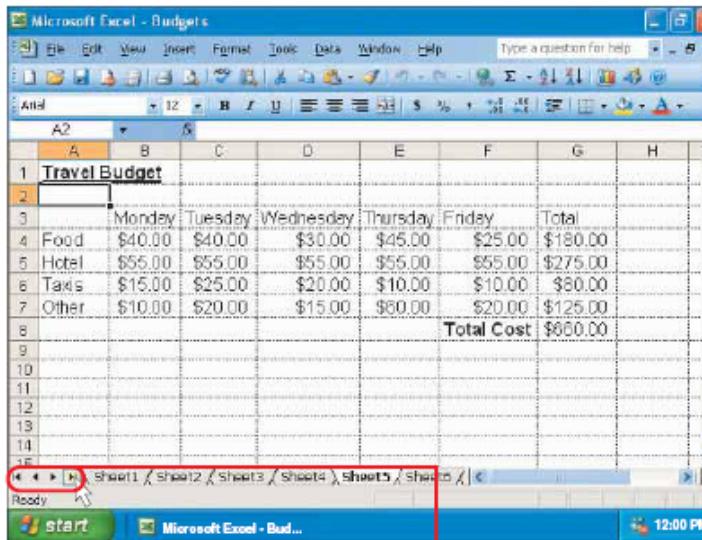

# Rad sa više radnih površina:

## SWITCH BETWEEN WORKSHEETS

This area displays a tab for each worksheet in your workbook. The displayed worksheet has a white tab.

- 1 Click the tab for the worksheet you want to display.
  - The worksheet you selected appears. The contents of the other worksheets in your workbook are hidden behind the displayed worksheet.

- 1 Click one of the following buttons to browse through the worksheet tabs.
  - Display first tab
  - Display previous tab
  - Display next tab
  - Display last tab

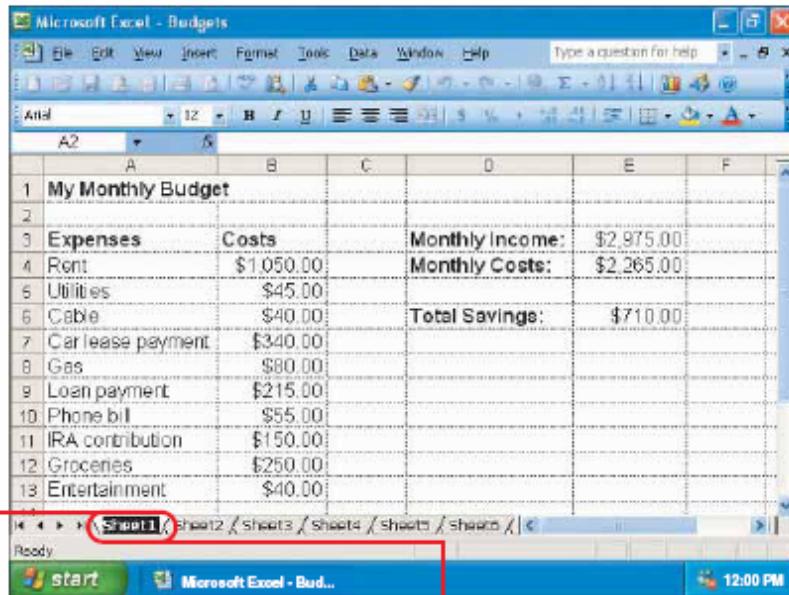

## BROWSE THROUGH WORKSHEET TABS

- If you have many worksheets in your workbook, you may not be able to see all the worksheet tabs.

*Note: To insert additional worksheets, see page 172.*

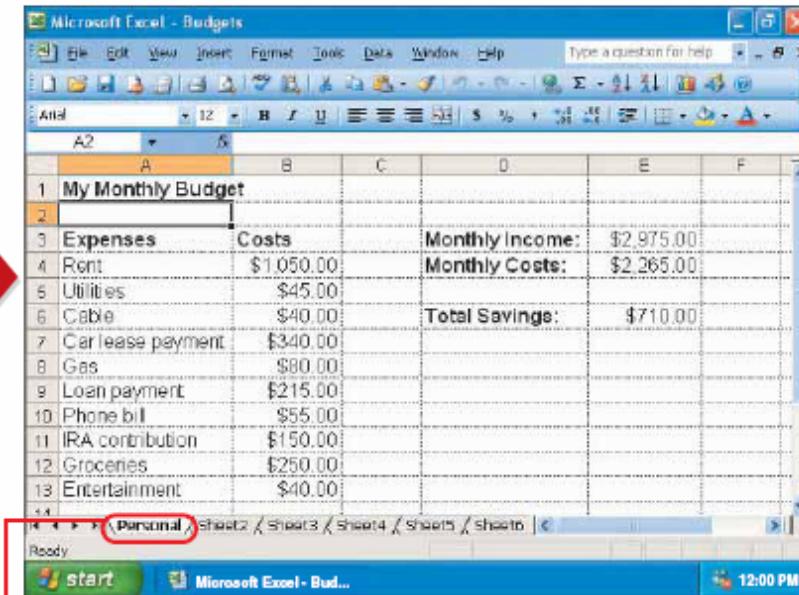

# Reimenovanje radne površine:

## RENAME A WORKSHEET

- 1 Double-click the tab for the worksheet you want to rename.

The name of the worksheet is highlighted.

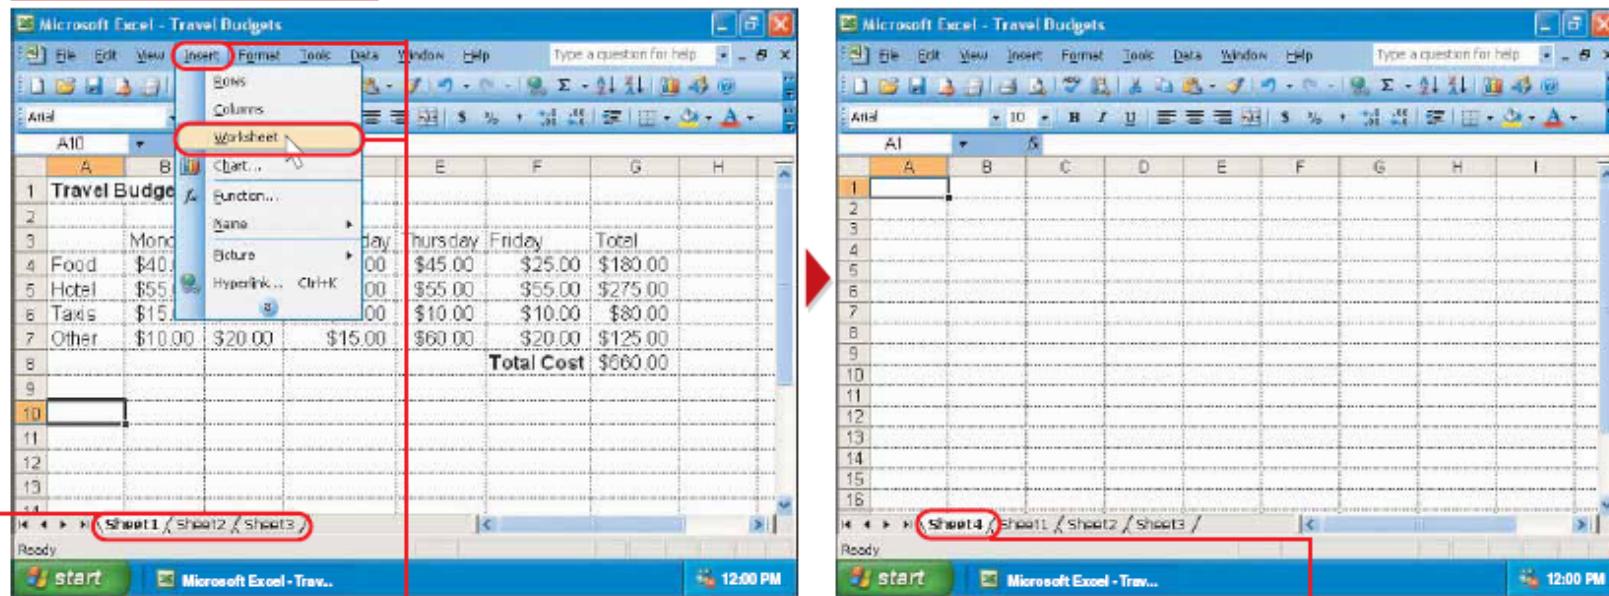

- 2 Type a new name for the worksheet and then press the **Enter** key.

*Note: A worksheet name can contain up to 31 characters, including spaces.*

# Dodavanje radnih površina:

## INSERT A WORKSHEET

1 Click the tab for the worksheet you want to appear after the new worksheet.

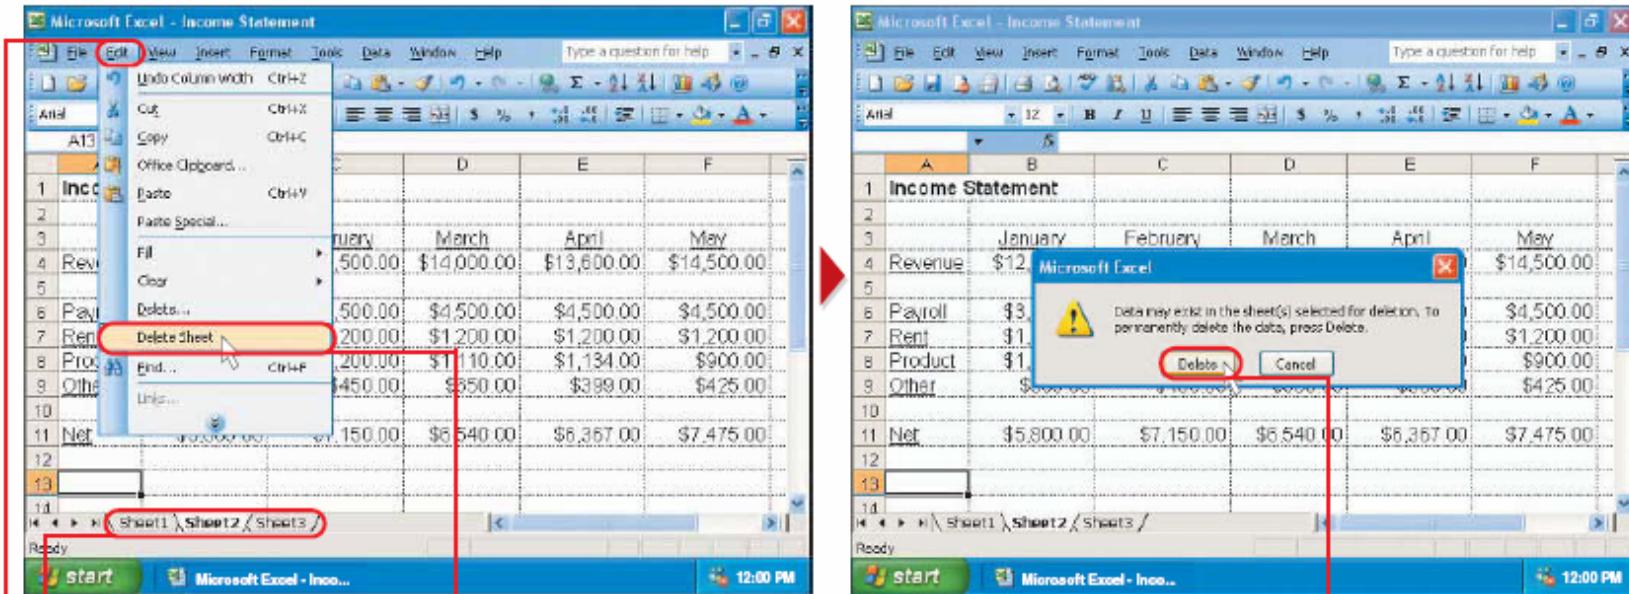

- 2 Click **Insert**.
- 3 Click **Worksheet**.

4 The new worksheet appears.

5 Excel displays a tab for the new worksheet.

# Brisanje radne površine:

## DELETE A WORKSHEET

1 Click the tab for the worksheet you want to delete.

2 Click **Edit**.

3 Click **Delete Sheet**.

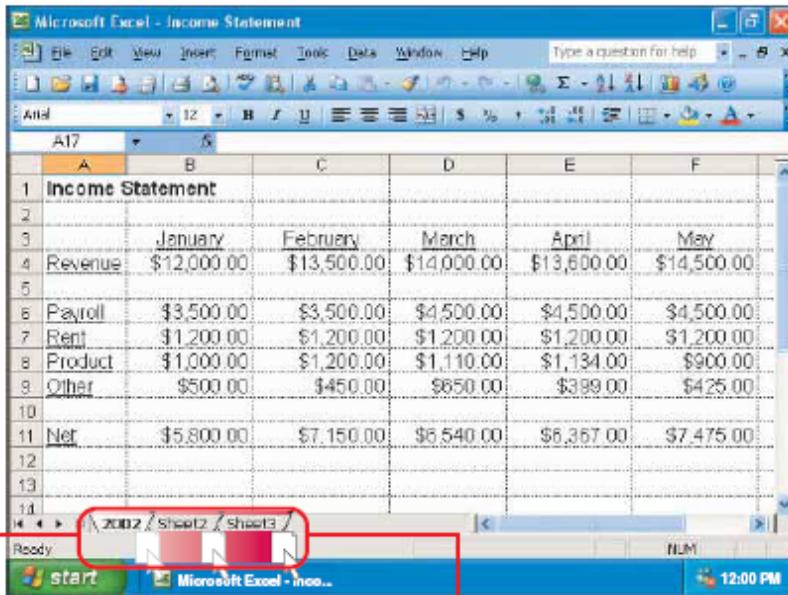

*Note: If Delete Sheet does not appear on the menu, position the mouse over the bottom of the menu to display the menu option.*

4 A warning dialog box may appear, stating that Excel will permanently delete the data in the worksheet.

4 Click **Delete** to permanently delete the worksheet.

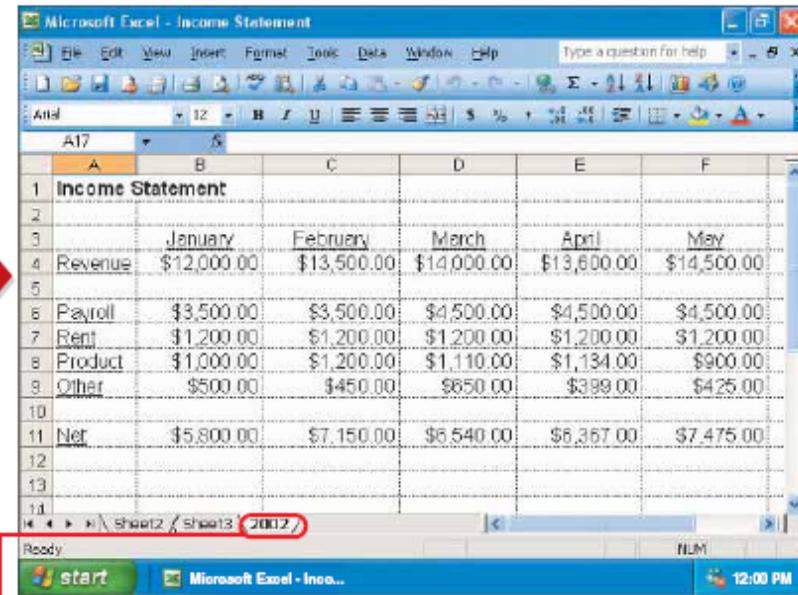

# Premeštanje radne površine:

## MOVE A WORKSHEET

1 Position the mouse over the tab for the worksheet you want to move.

2 Drag the worksheet to a new location.  
An arrow (▼) shows where the worksheet will appear.

The worksheet appears in the new location.

# Upisivanje formule sa podacima sa različitih radnih površina:

## ENTER A FORMULA ACROSS WORKSHEETS

# Grafici u Excelu:

# Osnovni tipovi grafika u Excelu:

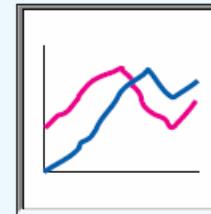

## Area

An area chart is useful for showing the amount of change in data over time. Each area represents a data series.

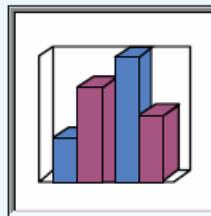

## Line

A line chart is useful for showing changes to data at regular intervals. Each line represents a data series.

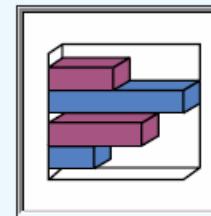

## Column

A column chart is useful for showing changes to data over time or comparing individual items. Each column represents an item in a data series.

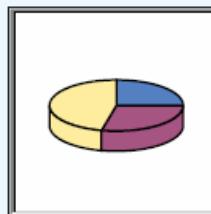

## Bar

A bar chart is useful for comparing individual items. Each bar represents an item in a data series.

## Pie

A pie chart is useful for showing the relationship of parts to a whole. Each piece of a pie represents an item in a data series. A pie chart can show only one data series at a time.

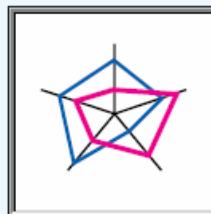

## Doughnut

A doughnut chart is useful for showing the relationship of parts to a whole. Unlike a pie chart, a doughnut chart can display more than one data series. Each ring represents a data series.

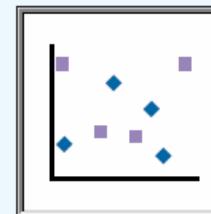

## Radar

A radar chart is useful for comparing the items in several data series. Each data series is shown as a line around a central point.

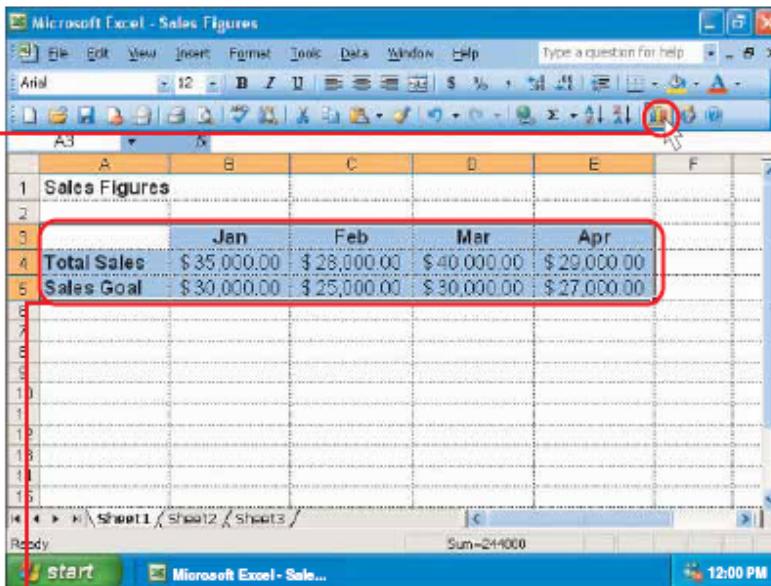

## XY (Scatter)

An XY (scatter) chart is useful for showing the relationship between two or more data series measured at uneven intervals.

# Kreiranje grafika:

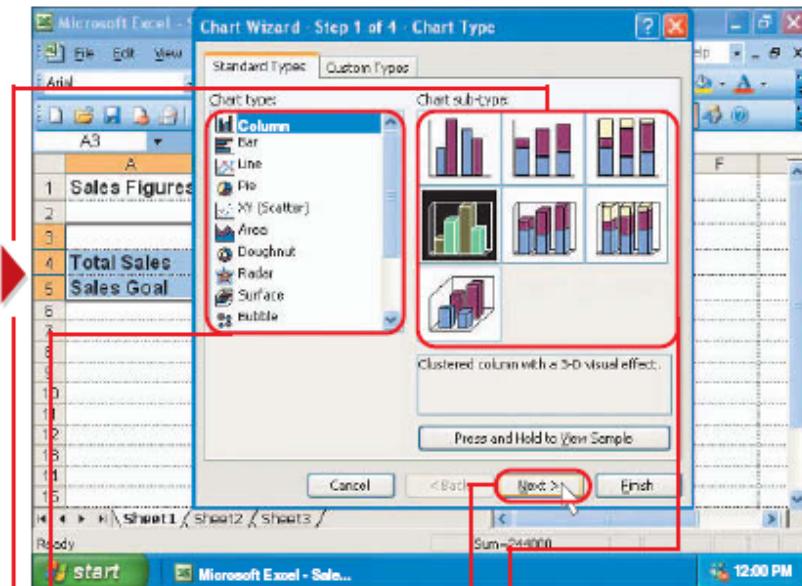

## CREATE A CHART

- 1 Select the cells containing the data you want to display in a chart, including the row and column labels. To select cells, see page 10.
- 2 Click to create a chart.

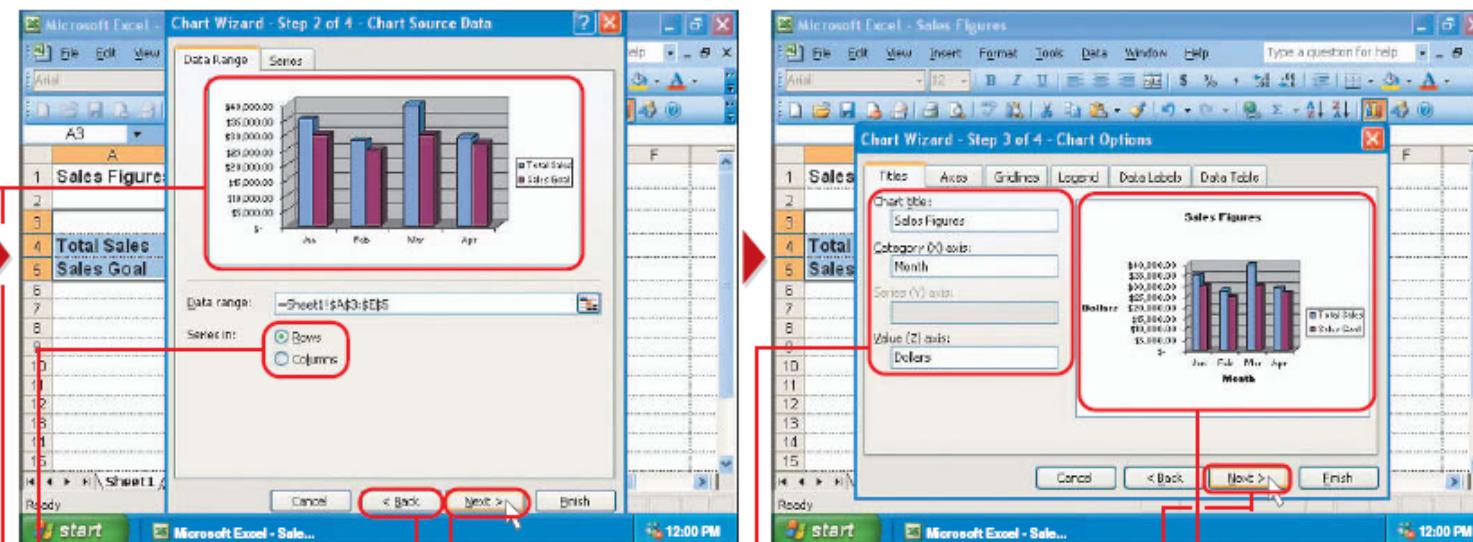

*Note: If is not displayed, click on the Standard toolbar to display the button.*

- The Chart Wizard appears.

- 3 Click the type of chart you want to create.
- 4 This area displays the available chart designs for the type of chart you selected.
- 5 Click **Next** to continue.

The figure consists of two side-by-side screenshots of Microsoft Excel. Both screenshots show a table of hiking boot sales data with columns for State, City, Product, and Units Sold. In the first screenshot, a 'Create List' dialog box is open over the data. It contains a text field with the value 'A4:D16' and a checked checkbox labeled 'My list has headers'. A red arrow points from the left towards this dialog. In the second screenshot, the dialog has been closed, and a thick blue border surrounds the selected range of cells (A4:D16). A red arrow points from the right towards this bordered area. The 'List' toolbar is visible at the bottom of the second screenshot's window.

State	City	Product	Units Sold
