

# **Ljiljana Damjanović-Vasilić - Curriculum Vitae**

## **Education:**

2004 Ph.D. in Physical Chemistry at the University of Belgrade-Faculty of Physical Chemistry  
2001 M.Sc. in Physical Chemistry at the University of Belgrade-Faculty of Physical Chemistry  
1996 B.Sc. in Physical Chemistry at the University of Belgrade-Faculty of Physical Chemistry

## **Professional positions:**

2017	Full Professor, University of Belgrade-Faculty of Physical Chemistry
2010-2017	Associate Professor, University of Belgrade-Faculty of Physical Chemistry
2009-2015	Vice Dean for Research & Postgraduate Studies, University of Belgrade-Faculty of Physical Chemistry
2004-2010	Assistant Professor, University of Belgrade-Faculty of Physical Chemistry
2001-2004	Teaching Assistant, University of Belgrade-Faculty of Physical Chemistry
1999-2001	Assistant Trainee, University of Belgrade-Faculty of Physical Chemistry
1996-1999	Scholarship holder of the Serbian Ministry of Science and Technology, University of Belgrade-Faculty of Physical Chemistry

**Research visits:** Durham University-Chemistry Department, Great Britain (five weeks), Institut de recherches sur la catalyse et l'environnement de Lyon UMR 5256, CNRS/Université Lyon1, Villeurbanne, France (eleven months; six visits), University of California at Santa Barbara-Chemistry Department, USA (two and a half years; two visits), Chemistry Department at Moscow State University of M.V. Lomonosov, Russia (summer practice, two months).

**Research interests:** materials science: synthesis and characterization of porous materials in particular functionalization of aluminosilicates, detailed characterization of obtained products and their environmental application for removal of pollutants from water solutions. Alongside, her research is focused on physicochemical investigation of art objects, particularly pottery, in order to obtain information on ancient ceramic technology and create national database based on the retrieved characteristics.

## **Participation in national projects:**

2011-	"Oxide-based environmentally-friendly porous materials for genotoxic substances removal", MSEP 172018, Faculty of Physical Chemistry, University of Belgrade.
2011-	"Urbanization and development processes of medieval society", MSEP 177021, Institute of Archaeology.

## **Participation in bilateral projects:**

2016-2017	French-Serbian project "Smart eco-friendly nanostructures and nanocomposites".
-----------	--

2016-2017 Croatian-Serbian project "Influence of structure of hierarchical porous zeolites on their adsorption properties".

### **Outreach activities:**

2010-2015 Coauthor and coordinator of project “Science all around” (“Nauka oko nas”).

### **Publications and citations:**

Number of papers in refereed journals (nov. 2017): 33

Number of citations (nov. 2017): 549 (Google Scholar)

H-index (nov. 2017): 12

### **Bibliography**

#### **1. Book chapters**

1. V. Rakić and Lj. Damjanović, “*Temperature programmed desorption (TPD) methods*”, Chapter 4, In: A. Auroux (ed.), Calorimetry and Thermal Methods in Catalysis, Springer Series in Materials Science, Vol. 154, Springer-Verlang Berlin Heidelberg, 131-174, 2013.
2. Lj. Damjanović and A. Auroux, “*Determination of acid/base properties by temperature programmed desorption (TPD) and adsorption calorimetry*”, Chapter 3, In: E.G. Derouane and A.W. Chester (eds.), Zeolite Characterization and Catalysis: A Tutorial, Springer Verlag, 107-167, 2009.
3. Lj. Damjanović and A. Auroux, “*Heterogeneous catalysis on solids*”, Chapter 11, In: M. Brown, P. Gallagher (eds.), The Handbook of Thermal Analysis & Calorimetry, Volume 5, Further advances, techniques and applications, Elsevier, Amsterdam, 387-438, 2008.

#### **2. Scientific papers**

1. M. Milojević-Rakić, V. Dondur, Lj. Damjanović-Vasilić, V. Rac, V. Rakić, “*The accessibility of sites active in dissociative adsorption of aromatic hydrocarbons in FeZSM-5 zeolite*”, Reaction Kinetics, Mechanisms and Catalysis (2017) doi: 10.1007/s11144-017-1275-y
