

Homework no. 5

Worst type of pollution – solution

After writing about the worst type of pollution affecting our environment, now write about a solution to this problem. You can pick any type of renewable energy to write about, including solar energy, wind energy, hydro energy, tidal energy, geothermal energy, biomass energy, or any other you think is a reliable, clean source of energy, you can even chose nuclear energy although whether this is considered a clean source of energy is still being debated. As before write your Essay Map first to help you organize your writing and the text should be 200 words long. Don't forget to do a spellcheck and word count before turning in your work.
