

## **Homework no. 6**

**Elon Musk – Most Important Invention.** As he is always working on many things at same time, there is much to choose from such as the Tesla electric cars, Space X Falcon Rocket, Hyperloop, Solar City, etc. So choose one invention and as before give your arguments on why you think it is the most important. I am **NOT** interested in his biography or personal life, just the scientific/engineering inventions. As before write your **Essay Map** first to help you organize your writing and the text should be 200 words long. Don't forget to do a spellcheck and word count before turning in your work.
